**Q12 Identify** the control measures needed to reduce the risk to workers (8)

A12 The control measures needed to reduce the risk to workers include:-

- the detection of underground services by using plans or cable/pipe detectors
- supporting the sides of the excavation by shoring or benching
- storing materials and spoil away from edge of the excavation
- providing means to prevent vehicles falling into the excavation such as stop blocks
- providing guard-rails and barriers to prevent people falling into the excavation
- providing means of support for adjacent structures to prevent collapse
- providing safe means of access/egress into the excavation
- testing for noxious fumes and providing ventilation if necessary
- using pumps to protect against flooding
- taking precautions to safeguard the workers from biological hazards or those caused by the presence of contaminated ground
- arranging for the excavation to be inspected at regular intervals by a competent person

**Q22 Outline** a hierarchy of measures for controlling exposures to hazardous substances. (10)

A22 The various stages of the usual hierarchy of risk controls are underlined in this answer.

Elimination or substitution is the best and most effective way of avoiding a severe hazard and its associated risks. Elimination occurs when a process or activity is totally abandoned because the associated risk is too high. Substitution describes the use of a less hazardous form of the substance. There are many examples of substitution, such as the use of water-based rather
