National Bureau of Standards, J. W. Locke,1970 A number of pre trial release studies which have been conducted during the past several years show that various measures of criminal activity while on release vary from 7.9 percent reindictment for those indicted on felony charges to 70 percent re arrest of those originally arrested on a robbery charge Little actual sentence data were available for or presented in these studies and no personal data on the defendants or facts about the crimes themselves were shown This document describes a pilot study of a thorough analysis of criminal cases including both felonies and misdemeanors in a four week sample of cases in the District of Columbia during the first half of 1968 The

method of data collection is described together with attendant problems Summary data for 712 defendants in a sample of 4 weeks taken from the first half of 1968 are presented Comparisons are made to show the re arrest rates for defendants initially charged with particular classes of crime Personal characteristics are examined to determine if any are significant predictors of recidivism A recidivism index is formulated to give the rate of re arrest per man day of exposure Robbery cases are examined in more detail Author *Understanding and Preventing Online Sexual Exploitation of Children* Ethel Quayle, Kurt M. Ribisl, 2013-03-01 Over the last decade there has been dramatically increased interest in the ways that technology has been used in the abuse and exploitation of children due in part to increasing numbers of convictions for child pornography related offenses Opinion swings between those who feel that there is a danger of distorting the threat posed to children by technology and those for whom it appears that the threat has been grossly underestimated Current literature surrounding the debate at times seems to create more questions than answers and what quickly becomes apparent is that the data we have to inform our understanding is partial potentially context specific and at times seemingly contradictory This book broadens our understanding of the complex nature of online sexual exploitation of children and considers the risk that those engaged in Internet related offences pose to children in both the online and offline environments It focuses on cutting edge research and conceptual thinking that views perpetrators within context examines those impacted by such offending describes emerging legal and policy issues and proposes innovative strategies for prevention within a dynamic global environment *Understanding and Preventing Online Sexual Exploitation of Children* responds to the growing call for help across all practice areas from judicial to therapeutic and will provide an invaluable resource for practitioners and policy makers working in the field as well as students and academics studying sexual exploitation and cyber crime *Women Police in a Changing Society* Mangai Natarajan, 2016-02-11 Offering a fascinating account of the development of women police over the past twenty years this book refers to the author s extended research in India to examine how the Indian experience demonstrates a valuable alternative to the Anglo American model not only for traditional societies but for women police in the West as well With reference to the establishment in 1992 of all women units in Tamil Nadu this unique experiment proved highly successful in enhancing the confidence and professionalism of women officers and ensuring the effectiveness and efficiency of the police At a time when policing is being rethought all over the world not only in traditional societies the Tamil Nadu practice illustrates important lessons for western countries that are finding it increasingly difficult to recruit and retain women officers Natarajan s remarkable book is an important and original contribution to the literature on gendered policing which to date has concentrated almost exclusively on the US and British experience
