**Product Design and Life Cycle Assessment** Ireneusz Zbicinski, 2006 *Circular Business Models in the Mobile Phone Industry* David Watson, Anja Charlotte Gylling, Naoko Tojo, Harald Throne-Holst, Bjørn Bauer, Leonidas Milios, 2017-11-30 The circular economy offers opportunities to reduce resource use and waste whilst providing business opportunities. This is also true in the mobile phone industry that has been characterised by high rates of product obsolescence. The emergence of the smart phone has changed the landscape making repair, refurbishment and resale attractive to businesses and consumers. Moreover, emerging modular phone design should allow functional upgrades with low resource wastage. This report investigates the adoption of circular business models within Nordic markets. Producers, retailers, refurbishers, recyclers and resellers tell of their motivation, experiences and the challenges that they face. A special look is taken at consumer and waste law and the challenges and opportunities they represent. The report ends with 17 policy proposals that can accelerate the adoption of circularity in the sector.

Designing with Photovoltaics Angèle Reinders, 2020-04-30 Designing with Photovoltaics covers a broad range of topics related to the design of products, buildings and vehicles with integrated photovoltaic (PV) technologies including storage aspect. It enables the reader to easily design new products, buildings and vehicles through use of innovative PV products. Diverse categories of product integrated PVs are discussed including applications of solar power for mobility and building integrated systems along with design and manufacturing related information about solar cells. Illustrating design cases of various PV powered products, special attention is paid to end users and environmental aspects of PV applications. Aimed at senior undergraduates, graduates and professionals in electrical engineering, architecture, design, physics, mechanical engineering and those specifically studying photovoltaics, it covers the different product integrated photovoltaics (PIPV) with a focus on design and manufacturing. Presents comprehensive overview of all aspects of designing with photovoltaics. Includes product integrated PV, building integrated PV and solar powered mobility concepts. Contains real design cases showing how to design with photovoltaics. Discusses context of environmental issues and user aspects.

Challenges sheds light on the optimization methods that form the basis of effective communication between networked devices. It is an excellent resource as it provides readers with a thorough understanding of the methods, ideas, and tactics essential to attaining seamless connectivity and improving performance. This book presents the fundamental ideas that govern network optimization, from maximizing throughput and lowering latency to handling a variety of communication protocols and minimizing energy use. It also addresses scalability issues, security flaws, and constantly changing IoT environments along with optimization techniques. This book uses cutting edge research and real world examples to give readers the knowledge and skills to address the complex problems associated with network optimization in intelligent IoT applications. It also examines machine learning driven predictive analytics, robust security protocols, flexible routing algorithms, and the integration of edge computing, all crucial instruments for overcoming obstacles and attaining peak performance. This book provides a comprehensive understanding of the principles, challenges, and cutting edge solutions in IoT network optimization for all kinds of readers, whether it is students, academicians, researchers, or industry professionals. This book unleashes the potential of networked smart devices, which can be unleashed in various sectors.

**Digital Business and Sustainable Development** Yongrok Choi, 2017-03-16 The Internet has ushered in a new era in the economies of networking. With the increasing need for optimization based on these network economies, the IT based e business has become a platform for study as well as daily practice. In a similar vein, global warming has raised many issues which come into conflict with traditional research and policies. The Internet revolution has also shifted our society from a government and company led economy to a netizen and consumer led business world. This book enlightens us on why a harmonized participation of traditional network members or interested groups is necessary and how we can create values from diverse fields of interests and objectives, including the corporate social responsibility (CSR) and eco friendly productivity. Digital Business and Sustainable Development integrates the platforms from these two fields of study based on the comparative analysis of Asian and other developing countries.
