SAGES Manual of Perioperative Care in Minimally Invasive Surgery Richard L. Whelan,James W. Fleshman,Dennis L. Fowler,2006-01-16 The second SAGES Society of American Gastrointestinal Endoscopic Surgeons manual was intended to be a companion piece for the successful first SAGES manual edited by Carol Scott Connor that was published more than 4 years ago Originally the goal was to concentrate on tersely covered or often ignored aspects of the preoperative preparation of the patient and the operating room as well as the postoperative care of patients undergoing minimally invasive operations It was also our intention to include a section for each procedure where several different port placement schemes would be presented and briefly discussed Unique to this manual the impact of the patient's body habitus short or long narrow or wide on port placement is also taken into account for many of the procedures Also unique are chapters devoted to hypothermia port wound closure and the management of subcutaneous emphysema and abdominal wall hemorrhage caused by trocars Naturally the surgeon tends to focus on the technical aspects of the procedure such as the operative tasks to be carried out the

order of operation and the position of the surgeon and assistant However it is critical that the surgeon be aware that the CO₂ pneumoperitoneum far more so than laparotomy results in multiple physiologic alterations that if not compensated for by the anesthesiologist and surgeon may endanger the patient or prevent the laparoscopic completion of the procedure
