The presented results are based on a detailed qualitative case study analysis of two software products and two software platforms and on a quantitative study of two software ecosystems. The results extend the existing literature on IP modularity by demonstrating a direct association between IP modular product or platform architecture and the related business models. The analysis also shows that the early consideration of IP-related requirements in the requirements engineering process of software systems can prevent costly and time-consuming re-modularizations. The quantitative analysis in two software ecosystems shows that IP modular platform architecture, which can allow increased openness while still maintaining value appropriation, can increase a platform's attractiveness for complementors. To summarize this book demonstrates the connections between IP management, software architecture, and the respective business models of software product or platform providers. **SAP Malakar Sudipta, 2019-09-20** Phases of SAP Activate Methodology Key features 400 PLUS Real-time SAP Activate SAP S/4HANA Interview questions and answers Numerous Tricky Real-time SAP Activate Case Studies and Demos SAP S/4HANA Approach Guidelines Explore the application scenarios of SAP Activate SAP Activate issues and challenges in large, mid, and small-scale projects and mitigation plan Digital transformation tips and tricks Intelligent enterprise tips and tricks Integration of SAP S/4HANA with machine learning intelligence Description The book promises to make you understand and practise the SAP Activate Framework.
