for some died off and disappeared totally from the face of the earth He explains how language culture and religion developed over hundreds of thousands of year even with the biological constants dictated by nature He offers compelling arguments on what made humans superior to other animals beyond just being able to walk upright and deftly use opposable thumbs Harari in his sweeping tale of birth survival and death categorically assumes the forces expounded in the evolutionary theories of Darwin and puts question marks on those milestones of human development that evolution cannot explain In a roughly chronological order he divides human progress into four distinct phases Read more

**Summary of Sapiens: A Brief History of Humankind by Yuval Noah Harari** Peter Cuomo, Complete summary of Yuval Noah Harari s book Sapiens A genetic mutation 70 000 years ago gave humans Homo sapiens the ability to imagine and believe things that aren t true which Harari argues had a profound impact on humanity s ability to cooperate in large groups The Cognitive Revolution is one of the key turning points in human history that Harari examines in great detail There are also references to the Agricultural Revolution 10 000 years ago and the Industrial Revolution 300 years ago both of which saw humanity migrate from foraging in the wild to farming in more permanent communities
