The Authors primary objective was to empower the student researcher to accomplish each of the steps in the process while never losing sight of the product that will help the children in their classrooms Whether developing an Abstract or writing in text citations student researchers are guided throughout the nuances of the Publication Manual of the American Psychological Association's 6th Edition

Action Research in the World Language Classroom Mary Lynn Redmond, 2013-06-01 The current thrust in the field of education is to improve teachers' understanding of how research on best practices can improve student learning The field of world language education introduces a double, perhaps a triple bind: teachers must be able to design and deliver instruction that aligns with national expectations for developing students' language and intercultural abilities for success in the global workplace yet in schools across America all K-12 students do not have the opportunity to study languages even though research supports their astonishing facility for acquisition Schools and teachers without resources including time to investigate and implement evidence-based best practices are ultimately held accountable for student performance If world language teachers are to advocate for languages they must use their expertise and share evidence of their students' progress The American Council on the Teaching of Foreign Languages (ACTFL) recently began development of a national research priorities agenda for grades preK-16 Action research, which is classroom-centered and inquiry-based, can contribute to our profession's efforts as it helps us to increase awareness of the critical need for language study in grades preK-16 World language teachers can become teacher-researchers in their own classrooms, gathering deeply meaningful insights into their students' progress that they can share with others Teacher-researchers investigate innovative approaches in response to their questions about teaching and learning which are rooted in daily experience They engage their students in fresh learning activities and student feedback helps them to make better decisions about instructional and assessment strategies Results can be shared with stakeholders

including parents administrators school board members and guidance counselors as evidence of what all kinds of students can do in languages At a time in our history when we are striving to prepare teachers for 21st century schools that prioritize global competence Action Research in the World Language Classroom is a timely resource for the profession It describes a natural engaging motivating way to contribute particularly for preservice teachers who are shaping their views and understanding about world language instruction and the connections between research and best practices The book includes four studies conducted by preservice teachers during their student teaching internships in North Carolina public schools The editor hopes that their work and observations will inspire and assist world language educators at all stages of their careers

[Language Ideologies and Linguistic Identity in Heritage Language Learning](#) Rachel Showstack, Diego Pascual y Cabo, Damián Vergara Wilson, 2024-04-16

[Language Ideologies and Linguistic Identity in Heritage Language Learning](#) addresses the ways in which discourses about language value and identities of linguistic expertise are constructed and negotiated in the Spanish heritage language HL classroom and how the classroom discourse shapes and is shaped by the world outside of the classroom. The volume examines the sociopolitical contexts, personal histories, and communicative practices of Spanish teachers and students in two diverse geographic regions: the US states of Texas and Kansas. Adopting an integrated sociocultural approach, it considers the ways in which individuals draw from multiple linguistic resources and social practices in daily interaction and how they articulate their beliefs about language through storytelling. Rich interactional data, examples from social media, and stories of community engagement are utilized to demonstrate how Spanish heritage speakers use language creatively and proactively to legitimize and claim power in their home and community linguistic practices. This is an invaluable resource for applied linguists who seek to better understand the relationship between language ideology and identity and for graduate students and researchers in the fields of linguistics, Spanish, and HL education.
