participants were invited to discuss issues in cognitive accounts of English ranging from fundamental to methodological to interdisciplinary and applied. The volume is accordingly divided into four parts. Part I Motivation in grammar deals with various phenomena in the grammar of English in the broadest sense of the term all of which are shown to be motivated by metaphorical and or metonymic operations. Part II Constructing meaning between grammar and lexicon contains five chapters dealing with phenomena ranging from various peculiarities of form meaning pairings such as synonymy polysemy and figurative meanings to concept formation. The four chapters that make up Part III are concerned with the phenomenon of interlinguistic and intercultural variation in the use of metaphorical and metonymic processes. The volume is concluded by Part IV the three papers of which attempt to reconsider some TEFL issues from a cognitive linguistic point of view.

Ins Ungefahre Dorothee Kimmich, 2018-02-12 Während die Differenz in den Theoriedebatten des 20. Jahrhunderts Schule machte versammelte die Geschichte der Ähnlichkeit von der unser Erkennen und Urteilen abhängt nur wenige Anhänger um sich und war selten Ausgangspunkt kulturtheoretischer Diskussionen. Dabei ordnen wir die Welt die Dinge Farben Töne und Erinnerungen Gesichter und Geschichten indem wir Ähnlichkeiten und Unähnlichkeiten wahrnehmen und bewerten. Und ohne die Fähigkeit etwas oder jemanden zu imitieren und nachzuahmen erlernen wir weder eine Sprache noch Klavierspielen weder Radfahren noch Seilspringen. Wiedererkennen, Zuordnen und Urteilen sind grundlegende Fähigkeiten mit denen wir uns im Alltag orientieren. Ins Ungefahre fürt auf das Gebiet des theoretisch wie praktisch anschlussfähigen Konzepts der Ähnlichkeit das in der Moderne zwar immer wieder thematisiert dann aber doch folgenreich vergangen wurde. Werden Ähnlichkeiten zugunsten von Differenzen und Oppositionen besehnen so ist dies nicht nur ein erkenntnistheoretisches sondern vor allem ein politisches Problem. Die Gleichheit vor dem Gesetz und die Ähnlichkeit der Kulturen ergänzen sich und machen deutlich dass radikale Älterität keine Gegebenheit sondern eine Frage der Perspektive ist.

Globale Produktion und Industriearbeit Marhild von Behr, Hartmut Hirsch-Kreinsen, 1998 Abstract Die Beiträge des vorliegenden Bandes fassen Ergebnisse aus einem mehrjährigen Forschungsprojekt zusammen das die Analyse internationaler Strategien großer Industrieunternehmen zum Gegenstand hat. Mit seiner Fragestellung bezieht sich das Projekt auf die gegenwärtige Diskussion über die Globalisierung der Wirtschaft und die Zukunft der Produktionsarbeit in traditionellen Industrien. Damit wird auch die aktuelle Standortdebatte berührt in der häufig mit kurzsichtigen Argumenten die inzwischen lang anhaltende Beschäftigungskrise auf die zunehmende Globalisierung zurückgeführt wird. Die in diesem Buch dargestellten Befunde zur Internationalisierung der Produktion beleuchten wesentliche Aspekte der Umsetzung internationaler Unternehmensstrategien und können zur Versachlichung der Diskussion beitragen. Das Forschungsprojekt zeichnet sich durch eine methodische Konzeption aus die für sozialwissenschaftliche Untersuchungen in zweierlei Hinsicht ungewöhnlich ist. Zum ersten wird die **Systematische Metaphernanalyse als Methode der qualitativen Sozialforschung** Rudolf Schmitt, 2016-06-23 Das Buch beabsichtigt die Forschungsmethodik einer systematischen Metaphernanalyse als Methode der

Wright, 2007-06-30 In this remarkable book Gary Wright brings his thirty years of experience as a physician in pediatric and family medicine together with his Ph.D. in philosophy to address the important problem of the nature of good medical reasoning His intimate experiential knowledge of the founding assumptions of managed health care in America today is abundantly evident in his powerful critique of the overly simplistic models of medical judgment that ground most of our health programs Writing with exceptional clarity heart felt compassion for the physical and emotional

suffering of patients and deep philosophical insight into the nature of human cognition Wright uses the conceptual tools of recent cognitive science to analyze and critique some of the most basic underlying conceptions of contemporary medical care To make it clear why we desperately need a richer more nuanced account of medical reasoning Wright gives a brilliant analysis of the complex internal structure of our concepts of health and disease showing that our present models are wholly incapable of dealing with the realities of actual human disease He then shows the error of assuming that we always know in advance what the medical and moral ends are for any medical situation This leads to a radical questioning of so called rational actor or economic models of rationality that are popular in medicine today However Wright s project is not merely critical More constructively he draws extensively on empirical research coming out of the cognitive sciences concerning the nature of concepts reasoning and judgment and he then appropriates this research into a broader pragmatist philosophical framework developed by the American philosopher John Dewey Wright finds in Dewey s theories of mind thought and experience a comprehensive account of human thinking that adequately captures the complexity of actual human conceptualization and reasoning At the heart of this new view lies an acknowledgment of the central role of imagination and values in all of our thinking He shows how we actually make sense of our experience by employing cognitive prototypes metaphorically defined concepts radially structured categories and other processes of imaginative reflection and evaluation The result of Wright s alternative view of mind and medical judgment is a practically useful model of medical reasoning that although not specifiable by a set of fixed rules can yet give realistic guidance for medical decisions It is a sensitive model that each of us would want our own physicians to adopt Prof Mark Johnson Department of Philosophy University of Oregon This is one of the best books I have read that addresses Dewey s method of intelligence in the context of practical including clinical decision making I loved it Prof Griffin Trotter Center for Health Care Ethics Saint Louis University USA
