Tools and Weapons – Digitalisierung am Scheideweg Brad Smith, Carol Ann Browne, 2020-02-16 Die Digitalisierung ist einer der definierenden Trends unserer Zeit. Informationstechnologien entwickeln sich dabei zugleich zu mächtigen Werkzeugen, bergen aber auch ernstzunehmende Risiken. Neben vielen positiven Errungenschaften konfrontiert sie unsere Gesellschaften jedoch auch mit existenziellen Bedrohungen wie der Gefahr durch Cybercrime, Eingriffe in die Privatsphäre und Angriffe auf demokratische Prozesse. Brad Smith, Präsident von Microsoft, und Carol Ann Browne, Senior Director of External Relations and Communications bei Microsoft, beides Insider aus der Schaltzentrale eines der weltweit führenden IT-Konzerne plädieren an alle Unternehmen, Organisationen und Regierungen jetzt zu handeln und die Weichen so zu stellen, dass künstliche Intelligenz und andere Technologien nicht zu Missbrauch, sondern in eine gute Zukunft für uns alle führen.

Tools and Weapons Brad Smith, Carol Ann Browne, 2019-09-10 The New York Times bestseller now updated with new material on cyber attacks, digital sovereignty and tech in a pandemic. From Microsoft's president and one of the tech industry's broadest thinkers, a frank and thoughtful reckoning with how to balance enormous promise and existential risk as the digitization of everything accelerates. A colorful and insightful insider's view of how technology is both empowering and threatening us. From privacy to cyberattacks, this timely book is a useful guide for how to navigate the digital future. Walter Isaacson, Microsoft president. Brad Smith operates by a simple core belief: When your technology changes the world, you bear a responsibility to help address the world you have helped create. In *Tools and Weapons*, Brad Smith and Carol Ann Browne bring us a captivating narrative from the top of Microsoft as the company flies in the face of a tech sector long obsessed with disruption as an end in itself and in doing so navigates some of the thorniest issues of our time: from privacy to cyberwar to the challenges for democracy far and near. As the tumultuous events of 2020 brought technology and Big Tech even further into the lives of almost all Americans, Smith and Browne updated the book throughout to reflect a changed world. With three new chapters on cybersecurity, technology and nation states, and tech in the pandemic, *Tools and Weapons* is an invaluable resource from the cockpit of one of the world's largest tech companies. *The Rise of Unmanned Warfare* Jacquelyn Schneider, MacDonald, 2023-12-15 What explains the current US arsenal of unmanned systems? Why, for example, is the contemporary arsenal dominated by aerial unmanned systems versus the munitions that dominated earlier developments? This book challenges traditional explanations for the proliferation of unmanned systems, which focus on capacity or structure. Instead, this book argues that beliefs and identities shape the structures and capacities we choose when we are investing in weapon systems. In particular, it traces beliefs about technological determinism and military revolutions, force protection and casualty aversion, and service identities to explain why the US has invested so heavily in remote-controlled unmanned aerial platforms over the last three decades. In doing so, the book illustrates how ideas become influence and ultimately manifest in budget lines, detailing the policy entrepreneurs' critical junctures and path dependencies that shape the lifecycle of beliefs.

about unmanned weapon systems The book begins by providing a historical overview of US unmanned systems investments taking an expansive view of unmanned technologies from land mines to missiles and drones from the revolutionary war to contemporary investments It then leans on theories of norms ideas and influence to detail the role of the Office of Net Assessment Vietnam 9 11 and armed service identity in building the US current unmanned arsenal Finally it concludes with what this case of unmanned technologies reveals about US support to Ukraine as well as contemporary weapons debates about cyber information technology space and hypersonic missiles
