This following provides a brief overview of the structure and content of various elements in a laboratory report, based on APA guidelines. The APA publication manual can be referred to for more detail.

The purpose of a lab report is to communicate research in a clear, systematic and standardised way. Primarily, a lab report should communicate the following things:

- **Why did I bother?** Why did I do this experiment and why is it an interesting contribution to science?
- **How did I do it?** How did I carry out this research (this should be detailed enough so that the experiment could be replicated precisely)?
- **What did I find?** what were the results of your study?
- **So what?** what do your findings mean in terms of your hypotheses and what theoretical contribution do they make?
