und in immer kürzeren Zeiträumen bereitgestellt werden. Hier hat sich das Single Source Prinzip bewährt. Inhalte werden in kleine Bausteine aufgeteilt und möglichst medienneutral an nur einer Stelle erstellt und gepflegt. Aus dem Baukasten können dann mit geeigneten technischen Mitteln flexibel die unterschiedlichen Medien passend bedient werden. Sissi Closs zählt zu Deutschlands führenden Experten für Onlinedokumentation und XML. Sie zeigt in diesem Buch, welche Herausforderungen die mobile Welt mit sich bringt und wie Unternehmen ihre Inhalte nach dem Baukastenprinzip an einer Stelle zusammenführen können, um sie dann mehrfach für unterschiedliche Darstellungen, Zusammenstellungen und Zielgruppen aufzubereiten. Ein Schlüsselbegriff ist dabei die Topic orientierte Strukturierung, mit der Inhalte in wiederverwendbare Bausteine zerlegt werden. Sie erfahren außerdem alles über die aktuelle Version der Topic basierten Informationsarchitektur DITA 1.2.

Communication on and via Technology Anneli Rothkegel, Sonja Ruda, 2012-07-04. The interdependency of technology and communication presents theoreticians as well as practitioners with a wide range of problems. Among the topics discussed in this interdisciplinary volume are technological knowledge in text and context in combination with cognitive and social conditions, knowledge transfer beyond languages and cultures, the influence of the world wide web on social communities.

Controlling Language in Industry Stephen Crabbe, 2017-01-30. This book provides an in depth study of controlled languages used in technical documents from both a theoretical and practical perspective. It first explores the history of controlled languages employed by the manufacturing industry to shape and constrain the information in technical documents. The author then offers a comparative analysis of existing controlled languages and distills the best practice features of those language systems. He concludes by offering innovative models that can be used to develop and trial a new controlled language. This book will be of interest to linguists working in technical and professional communication as well as writers and practitioners involved in the production of technical documents for companies in multiple industries and geographical locations.

Encyclopedia of Computer Science and Technology Harry Henderson, 2009. Presents an illustrated A-Z encyclopedia containing approximately 600 entries on computer and technology related topics.

Systems Analysis and Design Alan Dennis, Barbara Haley Wixom, Roberta M. Roth, 2014-11-11. The 6th Edition of Systems Analysis and Design continues to offer a hands on approach to SAD while focusing on the core set of skills that all analysts must possess. Building on their experience as professional systems analysts and award winning teachers, authors Dennis Wixom and Roth capture the experience of developing and analyzing systems in a way that students can understand and apply. With Systems Analysis and Design 6th Edition, students will leave the course with experience that is a rich foundation for further work as a systems analyst.

Connecting People

with Technology George Hayhoe, Helen M. M. Grady, 2020-11-26 This book explores five important areas where technology affects society and suggests ways in which human communication can facilitate the use of that technology. Usability has become a foundational discipline in technical and professional communication that grows out of our rhetorical roots which emphasize purpose and audience. As our appreciation of audience has grown beyond engineers and scientists to lay users of technology, our appreciation of the diversity of those audiences in terms of age, geography, and other factors has similarly expanded. We are also coming to grips with what Thomas Friedman calls the flat world, a paradigm that influences how we communicate with members of other cultures and speakers of other languages. And because most of the flatteners are either technologies themselves or technology-driven technical and professional communicators, they need to leverage these technologies to serve global audiences. Similarly, we are inundated with information about world crises involving health and safety issues. These crises are driven by the effects of terrorism, the aging population, HIV/AIDS, and both human-made and natural disasters. These issues are becoming more visible because they are literally matters of life and death. Furthermore, they are of special concern to audiences that technical and professional communicators have little experience targeting: the shapers of public policy, seniors, adolescents, and those affected by disaster. Biotechnology is another area that has provided new roles for technical and professional communicators. We are only beginning to understand how to communicate the science accurately without either deceiving or panicking our audience. We need to develop a more sophisticated understanding of how communication can shape reactions to biotechnology developments. Confronting this complex network of issues, we are challenged to fashion both our message and the audience's perceptions ethically. Finally, today's corporate environment is being shaped by technology and the global nature of business. Technical and professional communicators can play a role in capturing and managing knowledge in using technology effectively in the virtual workplace and in understanding how language shapes organizational culture. *Applied Computer Science for GGOS Observatories* Alexander N.J. Neidhardt, 2017-08-08 This book combines elementary theory from computer science with real-world challenges in global geodetic observation based on examples from the Geodetic Observatory Wettzell, Germany. It starts with a step-by-step introduction to developing stable and safe scientific software to run successful software projects. The use of software toolboxes is another essential aspect that leads to the application of generative programming. An example is a generative network middleware that simplifies communication. One of the book's main focuses is on explaining a potential strategy involving autonomous production cells for space geodetic techniques. The complete software design of a satellite laser ranging system is taken as an example. Such automated systems are then combined for global interaction using secure communication tunnels for remote access. The network of radio telescopes is used as a reference. Combined observatories form coordinated multi-agent systems and offer solutions for operational aspects of the Global Geodetic Observing System (GGOS) with regard to Industry 4.0. **Guide to the Software Engineering Body of Knowledge** Alain Abran, James W.

Moore,2001 Writing a Professional Life Gerald J. Savage,Dale L.
