Key Concepts in Theme Park Studies Florian Freitag, Filippo Carlà-Uhink, Salvador Anton Clavé, 2023-03-03. This book offers a comprehensive multidisciplinary introduction to theme parks and the field of theme park studies. It identifies and discusses relevant economic, social and cultural as well as medial, historical and geographical aspects of theme parks worldwide, from the big international theme park chains to smaller regional family operated parks. The book also describes the theories and methods that have been used to study theme parks in various academic disciplines and reviews the major contexts in which theme parks have been studied. By providing the necessary backgrounds, theories and methods to analyze and understand theme parks both as a business field and as a socio-cultural phenomenon, this book will be a great resource to students, academics from all disciplines interested in theme parks and professionals and policy makers in the leisure and entertainment as well as the urban planning sector.

Gods and Rollercoasters Crispin Paine, 2019-01-10. This worldwide study examines how religion gets into theme parks as mission, as an aspect of culture, as fable and by chance. *Gods and Rollercoasters* analyses religion in theme parks, looking at how it relates to modernism, popular culture, right wing politics, nationalism and the rise of the global middle class. Crispin Paine argues that religion has discovered a major new means of expression through theme parks. From the reconstruction of Biblical Jerusalem at the Holy Land Experience in Orlando through the world of Chinese mythology at Haw Par Villa in Singapore to the great temple theme park Akshardham in New Delhi, this book shows how people are encountering and experiencing religion in the context of fun, thrills and leisure time. Drawing on examples from six of the seven continents and exploring religious traditions including Christianity, Daoism, Buddhism, Hinduism and Islam, *Gods and Rollercoasters* provides a significant contribution to the study of religion, sociology, anthropology and popular culture.

Heritage Or Heresy Cameron Jean Walker, 2009-01-08. How can we effectively interpret and present one culture to another without stereotypes or over-simplifications? What is the best way to present an authoritative version of a national heritage without also endangering ancient sites or being insensitive to the local customs, beliefs and religious practices of the indigenous peoples? This volume addresses the ongoing thrust in archaeology to take the next step after preserving the past: interpreting that past for the future. That future audience includes both local citizens and tourists who may have little background in archaeology, anthropology or the history of the culture featured.

Walker presents the key components of the anthropological study of tourism as a global phenomenon with particular emphasis on the more prominent arguments for how and why tourism is a universal and meaningful human activity The highly controversial topic of authenticity is examined with special attention given to how authentic has been defined and how it relates to the ways in which archaeological sites artifacts and cultural traditions are presented or not presented to the visiting public The ephemeral promise of authenticity drives the heritage tourism industry which is a key consideration for the long term economy of the Maya Riviera and elsewhere Through analysis of seven archaeological sites on the Yucatan peninsula that are open to heritage touring Walker reveals the planned growth of the Maya Riviera since the early 1970s and examines the impact of international tourism on both ancient structures and the contemporary Maya people and culture

Reefs of Time Lisa S. Gardiner, 2025-06-10 How fossilized reefs hold clues to the survival of corals in the Anthropocene With rising global temperatures pollution overfishing ocean acidification and other problems caused by humans there's no question that today's coral reefs are in trouble As predictions about the future of these ecosystems grow increasingly dire scientists are looking in an unlikely place for new ways to save corals the past The reefs of yesteryear faced challenges too from changing sea level to temperature shifts and understanding how they survived and when they faltered can help guide our efforts to help ensure a future for reefs Lisa Gardiner weaves together the latest cutting edge science with stories of her expeditions to tropical locales to show how fossils and other reef remains offer tantalizing glimpses of how corals persisted through time and how this knowledge can guide our efforts to ensure a future for these remarkable organisms Gardiner takes readers on an excursion into the shallow end of deep time when marine life was much like today's yet unaffected by human influence to explore the cities of fossilized limestone left behind by corals and other reef life millennia ago The changes in reefs today are unlike anything ever seen before but the fossil record offers hope that the coral reefs of tomorrow can weather the environmental challenges that lie ahead A breathtaking journey of scientific discovery Reefs of Time reveals how lessons

from the past can help us to chart a path forward for coral reefs struggling for survival in an age of climate crisis and mass extinction

The Making of Heritage Camila Del Marmol, Marc Morell, Jasper Chalcraft, 2014-11-20 This volume explores the process of heritage making and its relation to the production of touristic places examining several case studies around the world Most existing literature on heritage and tourism centers either on its managerial aspects the tourist experience or issues related to inequality and identity politics This volume instead establishes theoretical links between analyses of heritage and the production and reproduction of places in the context of the global tourist trade The approach adopted here is to explore the production of heritage as a complex process shaped by local and global discourses that can have a deep impact on several policies and legislations Heritage itself has now become not only a global discourse but also a global practice which may eventually lead to the use of heritage as a field for hegemony From these perspectives heritage making may be incorporated in the world economy mainly through the global tourism trade The chapters in this book stress the need for identifying the intrinsic political implications of these processes relocating their study in political economic and social settings Combined with a diversified set of theoretical approaches and research methods guided by a common thematic rationale *The Making of Heritage* is at the forefront of current debates about heritage
