*Political Thought of President Ahmed Sékou Touré*, 1977 *Economics versus Reality* John M Legge, 2017-09-08 John M Legge shows the many ways in which the real world diverges from economics textbooks He argues that mainstream economic theory took a disastrous turn 140 years ago when it attempted to use calculus to explain human behaviour A real economy involves people who are not variables in equations This error led to a second mainstream economics becoming obsessed with equilibrium However constant change is the reality and one cannot explain the present without understanding the path taken to get here This book presents economics in historical context It includes a short account of the contributions

by some of the key figures in economic theory starting with Adam Smith Smith placed great weight on morality he believed that economic activity took place in a society and could not be justified except insofar as it advanced the interests of that society Too many economists have come to believe that the interests of society can be measured by a number that if a policy change raises GDP it is justified whatever its impact on people Legge places the economy within society and society within the environment explaining that every significant decision has a social and environmental impact as well as an economic dimension Seeking to provide answers to students professional business managers and those interested in the political process this work addresses the gap between theory and reality **The Power of Sustainable Thinking** Bob

Doppelt,2012-05-04 The future will be powered by sustainable thinking in business organizations governments and everyday life This revolutionary book tackles climate change sustainability and life success by starting with your mind It provides proven staged based methods for transforming thinking and behaviour beginning first with the reader s own cognitive patterns then moving to how individuals can motivate other people to change and finally to how teams and organizations can be motivated to change **Bad Feelings** Roy Schafer,2010-04-20 Bad feelings are ubiquitous to human experience

Everyone deals with grief envy disappointment dejection humiliation mortification and anxiety However when we consciously push troubling feelings aside and then avoid them we should be under no illusions that such repression empowers us to lead untroubled lives The price that we pay simply is feeling less alive Our attempts to avoid feeling pain manifest themselves in feelings of disconnection and numbness To make matters worse bad feelings often bring moralistic self condemnation that arises unconsciously or even consciously It is bad of you to feel that way You re being a nuisance to worry about that Many families even elevate mental health to the status of an Eleventh Commandment They believe that when they have negative feelings and express them this constitutes behavioral problems When they begin to feel anxious glum or ashamed they are stricken with guilt or fears of punishment Their goal is perfect adjustment and their taboo is the secret forbidden pleasure hidden by pain This book demonstrates how psychoanalytic understanding can reduce the painfulness of negative feelings and increase our tolerance for emotional pain This work can enable freedom from frightening vengeful and guilt ridden fantasies decrease reliance on passive and masochistic ways of being and increase our ability to take pleasure in the body to enjoy relations with others the use of one s assets and to take pride in one s achievements These changes outweigh the emotional pains that we inevitably suffer by living and they help us feel that it is worth our while to enjoy a lively existence

*Wild Signs and Star Paths* Tristan Gooley,2018-05-17 A paean to the beauty and majesty of nature especially the nature we overlook in our back gardens and local parks And like all the best books it makes the world around you a lot more interesting Spectator Beautifully written I promise you will feel more in tune with the world around after reading only one chapter of *Wild Signs and Star Paths* let alone the book in its entirety Royal Institute of Navigation A beautifully written almanac of tricks and tips that we ve lost along the way Observer Tristan Gooley author of the internationally bestselling

How To Read Water and The Walker's Guide to Outdoor Clues Signs shows how it is possible to achieve a level of outdoors awareness that will enable you to sense direction from stars and plants forecast weather from woodland sounds and predict the next action of an animal from its body language instantly Although once common this now rare awareness would be labelled by many as a sixth sense We have become so distanced from this way of experiencing our environment that it may initially seem hard to believe that it is possible but Tristan Gooley uses a collection of keys to show how everyone can develop this ability and enjoy the outdoors in an exciting way one that is both new and ancient Dumb Ideas Won't Create Smart Kids Eric M. Haas, Gustavo E. Fischman, Joe Brewer, 2014 *The Long Descent* John Michael Greer, 2008-09-01 Americans are expressing deep concern about US dependence on petroleum rising energy prices and the threat of climate change Unlike the energy crisis of the 1970s however there is a lurking fear that now the times are different and the crisis may not easily be resolved The Long Descent examines the basis of such fear through three core themes Industrial society is following the same well worn path that has led other civilizations into decline a path involving a much slower and more complex transformation than the sudden catastrophes imagined by so many social critics today The roots of the crisis lie in the cultural stories that shape the way we understand the world Since problems cannot be solved with the same thinking that created them these ways of thinking need to be replaced with others better suited to the needs of our time It is too late for massive programs for top down change the change must come from individuals Hope exists in actions that range from taking up a handicraft or adopting an obsolete technology through planting an organic vegetable garden taking charge of your own health care or spirituality and building community Focusing eloquently on constructive adaptation to massive change this book will have wide appeal
