unprecedented kind of employment problem before the country In India the service seekers are rapidly moving towards a gig economy for reasons such as i Cost cutting ii Skilled workforce iii No middleman iv Flexibility of timing work space and amount of service v Time saving etc India has a great potential for going towards Gig economy due to the tendency of expanding supply of freelancer service providers with lower skilled labour In this context the reverse migration of labour force can be a boon in disguise Small cities towns and even in villages too the promotion and practice of freelance service providers can be instrumental in creating local level job opportunities for surplus local workforce migrated labour 2 Another important area may be the Rural Roads Rural Houses Toilets Rain Water harvesting reservoirs Solar Energy System Installation Warehouse building etc constructions where large number of labourers can be absorbed by curtailing the gestation period of such ongoing and upcoming projects 3 Import substituting small production units like Toys Electrical small and basic items like bulbs switches plugs and sockets wires of household uses home decor small materials etc can be produced at local levels by absorbing local workforce Now it is important to see that how India can establish a novel viable and productive balance between all the above possible alternatives and reverse migration of labourers The basic objective of this Webinar is to have a fruitful discussion and discourse over the different aspects and instruments of employment creation for migrant labourers through different means and reach a policy oriented useful conclusion
