Risk Society Towards A New Modernity Published In Association With Theory Culture Society:

Risk Society Professor Ulrich Beck, 1992-07-01 This panoramic analysis of the condition of Western societies has been hailed as a classic This first English edition has taken its place as a core text of contemporary sociology alongside earlier typifications of society as postindustrial and current debates about the social dimensions of the postmodern Underpinning the analysis is the notion of the risk society The changing nature of society's relation to production and distribution is related to the environmental impact as a totalizing globalizing economy based on scientific and technical knowledge becomes more central to social organization and social conflict *Risk Society* Ulrich Beck, 1992-09-16 Western industrial society is widely seen to be going through a decisive transitional period into a form defined variously as post Enlightenment post Fordist or postmodern Arguing that we are instead facing a different modernity typified by reflexivity the author goes beyond these description to provide a coherent picture of the direction of global social change Underpinning the analysis is the notion of the risk society The author develops an overview of other key elements of current social development the centrality of the political economy of knowledge the changing roles of class and gender in a new work environment and the politics of the risk society Adapt du r sum de l diteur

COVID-19 and Risk Society across the MENA Region, 2022-09-22 The impact of the COVID 19 pandemic at the interlocking levels of politics economy and society have been different across regions states and societies In the case of the Middle East and North Africa which was already in the throes of intense tumult following the onset of the 2011 Arab Spring COVID's blows have on the one hand followed the trajectory of some global patterns while at the same time playing out in regionally specific ways Based on empirical country level analysis this volume brings together an international team of contributors seeking to untangle how COVID 19 unfolds across the MENA The analyses are framed through a contextual adaptation of Ulrich Beck's famous concept of risk society that pinpointed the negative consequences of modernity and its unbridled capitalism The book traces how this has come home in full force in the COVID 19 pandemic The editors Larbi Sadiki and Layla Saleh use the term Arab risk society They highlight short term and long term repercussions across the MENA These include socio economic inequality a revitalized state of authoritarianism challenged by relentless democratic struggles But the analyses are attuned to problem solving research The ethnographies of the pandemic included in this book investigate transformations and coping mechanisms within each country case study They provide an ethically informed research praxis that can respond to the manifold crises crashing down upon MENA politics and societies

Munar, Cathy H.C. Hsu, 2023-03-21 This book examines the relationship between gender and sustainability in tourism Whilst an extensive body of work exists in the areas of gender and sustainability these two fields of knowledge are seldom combined to examine tourism phenomena When we look at the evolution of tourism we see that sustainability has become an essential element in educational programmes policy making and strategic considerations for organisations and destinations Whilst the beginnings of tourism sustainability were challenging presently its relevance is seldom questioned However this situation is not the case with gender research Although gender theorising and research have existed for over a century and a rich legacy of knowledge exists on this topic meaningful and respectful engagement with this line of scholarship is thus far peripheral in tourism studies The aim of this book is to reflect on and rethink the intersection of gender and tourism sustainability through the lens of gender theory and feminist epistemology to stay with the trouble and devise pathways for sustainability gender knowledge This book will be of great interest to students researchers and academics in tourism gender and sustainability as well as tourism management The chapters in this book were originally published as a special issue of the Journal of Sustainable Tourism Routledge Handbook of Social and Cultural Theory Anthony Elliott, 2013-12-04 If today students of social theory read Jurgen Habermas Michel Foucault and Anthony Giddens then proper regard to the question of culture means that they should also read Raymond Williams Stuart Hall and Slavoj Zizek The Routledge Handbook of Social and Cultural Theory offers a concise comprehensive overview of the convergences and divergences of social and cultural theory and in so doing offers a novel agenda for social and cultural research in the twenty first century This Handbook edited by Anthony Elliott develops a powerful argument for bringing together social and cultural theory more systematically than ever before Key social and cultural theories ranging from classical approaches to postmodern psychoanalytic and post feminist approaches are drawn together and critically appraised There are substantive chapters looking at among others structuralism and post structuralism critical theory network analysis feminist cultural thought cultural theory and cultural sociology Throughout the Handbook there is a strong emphasis on interdisciplinarity with chapters drawing from research in sociology cultural studies psychology politics anthropology women s studies literature and history Written in a clear and direct style this Handbook will appeal to a wide undergraduate and postgraduate audience across the social sciences and humanities *The Politics and Policies of Relief, Aid and Reconstruction* Fulvio Attina, 2012-10-15 Disaster policies present a new challenge to the practitioners and students of global politics this book explains how political science enriches the contribution of the social sciences to the study of disaster relief aid and reconstruction following the major disaster events both natural and man made of recent times *Networked Governance and Transatlantic Relations* Gabriella Paar-Jakli, 2014-04-29 In today s complex and interconnected world scholars of international relations seek to better understand challenges spurred by intensified global communication and interaction The complex connectedness of modern society and politics compels us to investigate the pattern of interconnections among actors who inhabit social and political

spaces Gabriella Paar Jakli's study aims to advance theory and practice by examining the networks used by specialists in North America and Europe to achieve their policy goals in the area of science and technology Her book suggests that to overcome policy problems transnationally three critical factors should be considered First as science and technology policy becomes increasingly critical to resolving global issues it should be regarded as an integral element of the foreign policy process Second as liberal international relations theory argues the increasing role of NGOs must be taken seriously alongside states as vital agents of policy reform Third as transatlantic relations remain center to maintaining the global order they must be reconsidered Paar Jakli assesses the role of digital networks as facilitators of regional cooperation Utilizing various techniques of social network analysis her research indicates an active and structurally discernible network in cyberspace among transatlantic organizations and demonstrates the role of virtual networks as facilitators of cooperative arrangements in transatlantic relations Paar Jakli's original research uses social network analysis to investigate transatlantic cooperation a new approach that will be noteworthy to network and transatlantic scholars as well as policymakers

Revisiting Crimes of the Powerful Steven Bittle,Laureen Snider,Steve Tombs,David Whyte,2018-06-13 Frank Pearce was the first scholar to use the term crimes of the powerful His ground breaking book of the same name provided insightful critiques of liberal orthodox criminology particularly in relation to labelling theory and symbolic interactionism while making important contributions to Marxist understandings of the complex relations between crime law and the state in the reproduction of the capitalist social order Historically crimes of the powerful were largely neglected in crime and deviance studies but there is now an important and growing body of work addressing this gap This book brings together leading international scholars to discuss the legacy of Frank Pearce's book and his work in this area demonstrating the invaluable contributions a critical Marxist framework brings to studies of corporate and state crimes nationally internationally and on a global scale This book is neither a hagiography nor a review of random areas of social scientific interest Instead it draws together a collection of scholarly and original articles which draw upon and critically interrogate the continued significance of the approach pioneered in Crimes of the Powerful The book traces the evolution of crimes of the powerful empirically and theoretically since 1976 shows how critical scholars have integrated new theoretical insights derived from post structuralism feminism and critical race studies and offers perspectives on how the crimes of the powerful and the enormous ongoing destruction they cause can be addressed and resisted

New Medicalism and the Mental Health Act John Fanning,2018-08-09 Ten years have passed since the Mental Health Act MHA 2007 came into force in England An amending statute the Act reformed the MHA 1983 and reshaped the law governing the compulsory care and

treatment of people suffering from mental disorders Primarily driven by concerns about risk it sought to remove legalistic obstacles to civil commitment and extend the law's coercive reach into the community At the time of its introduction the 2007 Act was written off as a retrograde step and a missed opportunity for radical rights focused reform Despite this little attention has been paid to its impact in the years since Published to coincide with the tenth anniversary of the 2007 Act this book offers a timely evaluation of mental health law and policy in England It argues that the current MHA defies easy categorisation within any of the descriptive models which have customarily narrated the mechanics of civil commitment namely legalism new legalism and medicalism It therefore makes the case for a new model new medicalism to account for the 2007 Act's enhancement of the discretion of mental health professionals for the express purposes of facilitating the management of situations of risk In doing so the book critically examines the problems inherent in civil commitment frameworks organised around the concept of risk explores the theoretical foundations of new medicalism considers the challenges facing proponents of future reform in the era of the UN Convention on the Rights of Persons with Disabilities and reflects on the 2007 Act's practical impact

Theological Perspectives on a Surveillance Society Eric

Stoddart, 2016-02-17 This book looks at contemporary surveillance practices and ideologies from a Christian theological perspective Surveillance studies is an emerging inter disciplinary field that brings together scholars from sociology criminology political studies computing and information studies cultural studies and other disciplines Although surveillance has been a feature of all societies since humans first co operated to watch over one another whilst hunting and gathering it is the convergence of information technologies within both commerce and the state that has ushered in a surveillance society There has been little if any theological consideration of this important dimension of social organisation this book fills the gap and offers a contribution to surveillance studies from a theological perspective broadening the horizon against which surveillance might be interpreted and evaluated This book is also an exercise in consciousness raising with respect to the Christian community in order that they may critically engage with a surveillance society by drawing on biblical and theological resources Being the first major theological treatment in the field it sets the agenda for more detailed considerations
