Energy Efficiency Clauses in Charter Party Agreements George Adamantios Psarros, 2016-12-10 This book provides practical solutions for addressing energy efficiency as a clause term within a charter party contract For this upon a reflection of the regulatory craft it analyzes key concepts of case law and discusses them together with commercial and economic principles In this way the book aims at offering a comprehensive interdisciplinary view of the chartering process together with a new approach for safeguarding energy efficiency investments A special emphasis is given to the maritime industry Here the newly developed framework based on game theory has been successfully applied to demonstrate the importance of including a clause term in contract negotiation to achieve protection against both an uncertain market and an even more challenging shipping environment The book not only fills a gap in the literature covering a topic that has been largely

neglected to date yet it offers researchers and practitioners extensive information to change the chartering process radically
