Sand Grain Size Analysis Faculty:

Field Methods for Geologists and Hydrogeologists Fakhry A. Assaad, James W. LaMoreaux, Travis Hughes, 2013-03-09

This book is designed for scientists and engineers who want practical information to plan, manage, write and review geologic and hydrologic projects and reports. It provides step by step methods to prepare more timely, readable and technically accurate reports. Detailed guidelines are provided to prepare the different subjects included in this book. Source references, project proposals and checklists are included to assist authors. The use of the techniques described in this book will result in less time spent in report writing, editing, rewriting and review, which will save time and money. This book is the result of nearly 50 years of experience in program and project development in the field of hydrogeology. The two main authors, P. E. LaMoreaux and Fakhry Assaad, who submitted both the idea and the major subjects of the book, have been closely associated during this period with the Geological Survey of Egypt, the General Desert Development Organization in Egypt, the U.S. Geological Survey, USGS, the Geological Survey of Alabama, the University of Alabama, and in a great variety of consulting projects in different States of America and over the world. It is based on experience from the assignment and supervision of many professionals with a great variety of academic training and experience.

Environmental Monitoring and Characterization Janick Artiola, Ian Pepper, Mark L. Brusseau, 2004-06-10. Environmental Monitoring and Characterization is an integrated, hands-on resource for monitoring all aspects of the environment. Sample collection methods and relevant physical, chemical and biological processes necessary to characterize the environment are brought together in twenty chapters which cover sample collection methods, monitoring terrestrial, aquatic and air environments, and relevant chemical, physical and biological processes and contaminants. This book will serve as an authoritative reference for advanced students and environmental professionals. Examines the integration of physical, chemical and biological processes. Emphasizes field methods and real time data acquisition made more accessible with case studies, problems, calculations and questions. Includes four color illustrations throughout the text. Brings together the concepts of environmental monitoring and site characterization.
