SAP Screen Personas 2.0 Configuration Guide - Addendum

Knowledge Base Article - Updated on Sep 21, 2015 02:52

After the SAP Screen Personas add-on is installed, the following steps need to be completed in order to perform the add-on configuration. Do not start the pre-requirements and installation for SAP on-premise systems based on the [add-on](#).

Screen Personas 2.0 can be configured as a single system or multiple system setup. Refer to the [Screen 2.0 add-on available at http://bit.ly/sap-complex-2.0](#) for more details on this topic and choose a setup before proceeding with the configuration. The system where Screen Personas add-on is installed will be referred to as the Screen Personas system and the ERP system which is connected to will be referred to as the target SAP system. In a single system setup, both target SAP and Screen Personas systems will be the same system.

It is recommended to have a single system setup for production use and for a smoother migration to Screen Personas 2.0.

Target SAP System

Configure Silverlight Cross Domain Policy Files

Procedure:

- On the target SAP system using the SAP GUI application, create an entry with same client access policy url for the system and make it work off the path. Sample content is as follows:

```
clientaccesspolicy.xml
```

[Sample entry](#)

More information on the cross domain policy file is available on the [SCN link](#).

- Go to transaction RZ10.
- Locate key 'SAP_HTTPFILE_ACCESS_URL' in the profile.
- Add following to profile:

```
sap.httpfile.access.url
```

```
/sap/public/!icmcdm!/,SAPROOT=%$(SAP_HTTPFILE_ROOT),ARCHIVE=%$(SAP_DOCUMENTABLE)/ITS,SAP,CACHECTRL=%20000
```

```
sap.httpfile.access.url
```

```
PREFIX=/clientaccesspolicy.xml,SAPROOT=absolute path to/c/clientaccesspolicy.xml,CACHECTRL=0
```

```
sap.httpfile.access.url
```

```
PREFIX=/crossdomain.xml, SAPROOT=absolute path to/c/crossdomain.xml,CACHECTRL=0
```

Ensure that the absolute path to is replaced with the actual path to the system.

- Check the clientaccesspolicy.xml and crossdomain.xml files are correctly in the URL: <http://localhost:port/clientaccesspolicy.xml>. For example: <http://sample.com:8001/clientaccesspolicy.xml> and <http://sample.com:8001/crossdomain.xml>
