The Spiritual Rococo GauvinAlexander Bailey,2017-07-05 A groundbreaking approach to Rococo religious d r and spirituality in Europe and South America The Spiritual Rococo addresses three basic conundrums that impede our understanding of eighteenth century aesthetics and culture Why did the Rococo ostensibly the least spiritual style in the pre Modern canon transform into one of the world s most important modes for adorning sacred spaces And why is Rococo still treated as a decadent nemesis of the Enlightenment when the two had fundamental characteristics in common This book seeks to answer these questions by treating Rococo as a global phenomenon for the first time and by exploring its moral and spiritual dimensions through the lens of populist French religious literature of the day a body of work the author calls the Spiritual Rococo and which has never been applied directly to the arts The book traces Rococo s development from France through Central Europe Portugal Brazil and South America by following a chain of interlocking case studies whether artistic literary or ideological and it also considers the parallel diffusion of the literature of the Spiritual Rococo in these same regions placing particular emphasis on unpublished primary sources such as inventories One of the ultimate goals of this study is to move beyond the cliché of Rococo s frivolity and acknowledge its essential modernity Thoroughly interdisciplinary The Spiritual Rococo not only integrates different art historical fields in novel ways but also interacts with church and social history literary and post colonial studies and anthropology opening up new horizons in these fields

capable of dealing with oppressive situations and of performing particular ways of resistance The book also refers to the trajectories of some Bolivians who had previously migrated to Spain and returned to Argentina after the European crisis in 2008 And it compares the south south labor migration from Bolivia to Argentina with the north north one from Tajikistan to the Russian Federation The focus on labor migrants does not lead to a reductionist economic analysis of their trajectories experiences and prospects for the future On the contrary they are studied from a holistic anthropological approach considering that migrants make sense of their territorial mobility from complex points of view anchored in their life experiences Therefore contributors consider that migration is a process that involves economic social cultural and political dimensions
