It covers the widely applied syllabus of Accounting at universities on bachelors and masters level. In this book, the application of the methods comes first. The Basics teach how to do Accounting by a case study based approach. All cases were taken from former exam papers at international universities and calculated completely and illustrated understandably. Bookkeeping and Financial Accounting covers the preparation of financial statements based on IFRS. Bookkeeping is taught as far as it is required for the understanding by managers. More formal aspects about how to keep financial records are cut short to the minimum.

Resistance to Changes in Financial Reporting Standards Edel Lemus, 2016-08-17 This book investigates current resistance to the ongoing change from US Generally Accepted Accounting Principles (GAAP) to International Financial Reporting Standards (IFRS). 138 countries have thus far adopted IFRS as a singular accounting language, while the Securities and Exchange Commission (SEC), the Financial Accounting Standard Board (FASB), and the International Accounting Standard Board (IASB) have determined that IFRS should be adopted optionally in the United States by 2016. The book shows that IFRS should act as a singular accounting language which will promote high transparency and a better economic position in the
