My adventure with science Atma Ram Jain, 2021-09-23 The book describes the experiences of a village boy born in U P and his efforts to get himself educated and take interest in science to become a scientist in a premier organization ISRO and to head one of the most important atmospheric research laboratories of ISRO in the country at its establishment phase This laboratory has now turned from a tiny plant to a massive Banyan tree providing an opportunity to a number of young scientists to carry out advanced research in various areas of atmospheric science like the lower middle and upper atmosphere It is believed that this book would generate interest and attract a number of young people to do research in various areas of atmospheric science These areas are so vast that they still remain a challenging theme for advanced research Daily Graphic Elizabeth Ohene, 1980-02-19

Role of Science and Technology for Sustainable Future

Ranbir Chander Sobti, 2024 This book discusses the role of science and technology in forging a sustainable and harmonious world It delves into new horizons in healthcare food security climate change energy sustainable transportation role of computational and data sciences in sustainability and mental health and aims to cultivate innovative solutions that benefit both the planet and its inhabitants The second volume is inspired by a unified objective preserving our planet fostering universal well being and envisioning a world where collective efforts drive positive change through an exploration of conventional and emerging technologies The book chapters enrich the global discourse on sustainability steering us toward a resilient and healthier future With every chapter authored by dedicated experts this book stands as a testament to the commitment to a better world and serves as a great resource for researchers environmentalists and students *A German Course for Science Students* Jethro Bithell, Arthur Cyril Dunstan, 1929 *The Dynamics of Electrons in Linear Plasma Devices and Its Impact on Plasma Surface Interaction* Michael Hubeny, 2019-02-15 Turbulence in plasma surface interaction holds crucial uncertainties for its impact on material erosion in the operation of fusion reactors In this thesis the design development and operation of a Thomson scattering diagnostic and its novel implementation with fast visual imaging created a versatile tool to investigate intermittently occurring plasma oscillations Specifically ballistic transport events in the plasma edge constituting turbulent transport have been targeted in this thesis With the help of a custom photon counting algorithm the conditional averaging technique was applied on Thomson scattering for the first time to allow spatial and pseudo time resolved measurements Since plasma turbulence and the emerging transport phenomena are comparable in most magnetized devices the diagnostic development and the results from the linear plasma device PSI 2 are useful for an implementation of similar techniques in larger fusion experiments Furthermore the obtained results indicate a strong enhancement of erosion with turbulent transport and thus underline the importance of dedicated experiments investigating plasma turbulence in the
