Cases in Technical Communication Andrea Breemer Frantz, 1999 This reader contains 20 cases that show students how real world organizations address communications issues Sociotechnical Communication in Engineering Jon Leydens, 2015-10-14 This collection explores why engineering communication constitutes sociotechnical communication Sociotechnical communication acknowledges that engineering communication occurs not in a vacuum but shapes and is shaped by multiple social forces Through diverse research cases the authors show how sociotechnical communication disrupts common myths in engineering communication the myth that communication can be purely technical and neutral and that data speak for themselves The book highlights these myths considering first how styles types and means of sociotechnical communication played pivotal and differing roles in the evolution of wind power technology in Denmark and

Germany The role of myth in engineering blogs is also examined wherein the effect of engineers maintaining objective or neutral personae accentuating technical facts over their social relevance and eschewing controversy is to decrease public interest in engineering issues We see the myths emerge again via product development engineers whose narrow technical roles constrain their identities and may contribute to constraining their design innovation capacities in contrast to more holistic flexible spaces that foster innovation The myths are also apparent in constructing bridges across Millennial Baby Boomer generational divides to facilitate engineering collaboration and knowledge transfer among engineers Finally the myths are situated in light of related myths and broader research trends in engineering communication This book was originally published as a special issue of *Engineering Studies* *Literate Lives in the Information Age* Cynthia L.
