**Essentials of Food Science, Instructor's Manual** Vickie Vaclavik, Elizabeth W. Christian, 2007-11-23

Essentials of Food Science covers the basics of foods, food science and food technology. Though it is part of our Food Science Text series, the book is meant for the non-major intro course either taught in the food science or nutrition/dietetics department. Though the book previously was organized around the USDA Food Pyramid, reviewers felt that this was outdated. The revised pyramid will now be mentioned in appropriate chapters only. Other updates include new photos, website references and culinary alerts for culinary and food preparation students. Two added topics will be RFID Radio frequency ID tags and trans fat disclosures. There will be thorough updates on food commodities, optimizing quality, laws and food safety.

This book is a companion volume of A Textbook of Chemical Technology Volume I written by the same author. The two books cover the complete syllabi of Chemical Engineering and Chemical Technology programmes leading to the B.Tech degree. The book explains the basic principles of chemical engineering and operating conditions of chemical plants in India. It discusses all major organic chemical industries including petroleum technology, petrochemicals, polymer science, pulp and paper technology. It also deals with pesticides, coal and coal chemicals and the pharmaceutical industry. Keeping the importance of environmental protection and prevention and control of hazards in mind, a few chapters on planned industrial development, environmental impact assessment and prevention of hazards in chemical industries have also been included. This book will also serve as a reference for practicing engineers and technologists.
