The Aashto Lrfd Bridge Design Specifications Section 5:

Application of LRFD Bridge Design Specifications to High-strength Structural Concrete Neil Middleton Hawkins, Daniel Alexander Kuchma, National Cooperative Highway Research Program, 2007 At head of title National Cooperative Highway Research Program **AASHTO LRFD Bridge Design Guide Specifications for GFRP-reinforced Concrete Bridge Decks and Traffic Railings**, 2009 Glass fiber reinforced polymer GFRP materials have emerged as an alternative material for producing reinforcing bars for concrete structures GFRP reinforcing bars offer advantages over steel reinforcement due to their noncorrosive nature and nonconductive behavior Due to other differences in the physical and mechanical behavior of GFRP materials as opposed to steel unique guidance on the engineering and construction of concrete bridge decks reinforced with GFRP bars is needed These guide specifications offer a description of the unique material properties of GFRP composite materials as well as provisions for the design and construction of concrete bridge decks and railings reinforced with GFRP reinforcing bars Guide Specifications and Commentary for Vessel Collision Design of Highway Bridges, 2nd Edition, with 2010 Interim Revisions , *Application of the LRFD Bridge Design Specifications to High-strength Structural Concrete* S. H. Rizkalla, National Cooperative Highway Research Program, 2007 Explores recommended revisions to the American Association of State Highway and Transportation Officials Load and Resistance Factor Design LRFD Bridge Design Specifications to extend the applicability of the flexural and compression design provisions for reinforced and prestressed concrete members to concrete strengths greater than 10 ksi **AASHTO Guide Specifications for LRFD Seismic Bridge Design**, 2011 This work offers guidance on bridge design for extreme events induced by human beings This document provides the designer with information on the response of concrete bridge columns subjected to blast loads as well as blast resistant design and detailing guidelines and analytical models of blast load distribution The content of this guideline should be considered in situations where resisting blast loads is deemed warranted by the owner or designer *AASHTO LRFD Bridge Design Specifications* American Association of State Highway and Transportation Officials, 1994 The provisions of these Specifications are intended for the design evaluation and rehabilitation of both fixed and movable highway bridges Mechanical electrical and special vehicular and pedestrian safety aspects of movable bridges however are not covered Provisions are not included for bridges used solely for railway rail transit or public utilities For bridges not fully covered herein the provisions of these Specifications may be applied as augmented with additional design criteria where required These specifications are not intended to supplant proper training or the exercise of judgment by the Designer and state only the minimum requirements necessary to provide for public safety The Owner or the Designer may require the sophistication of design or the quality of materials and construction to be higher than the minimum requirements The concept of safety through redundancy and ductility and protection against scour and collision are emphasized The design provisions of these Specifications employ the Load and Resistance Factor Design LRFD methodology

The factors have been developed from the theory of reliability based upon current statistical knowledge of loads and structural performance. Methods of analysis other than those included in previous Specifications and the modelling techniques inherent in them are included and their use is encouraged. The commentary is not intended to provide a complete historical background concerning the development of these or previous Specifications nor is it intended to provide a detailed summary of the studies and research data reviewed in formulating the provisions of the Specification. However, references to some of the research data are provided for those who wish to study the background material in depth. The commentary directs attention to other documents that provide suggestions for carrying out the requirements and intent of these Specifications. However, those documents and this commentary are not intended to be a part of these Specifications. Page 1 1

Highway Bridge Superstructure Engineering Narendra Taly, 2014-11-21 A How To Guide for Bridge Engineers and Designers Highway Bridge Superstructure Engineering LRFD Approaches to Design and Analysis provides a detailed discussion of traditional structural design perspectives and serves as a state of the art resource on the latest design and analysis of highway bridge superstructures. This book is applicable to highway bridge design. **Design of Concrete Structures Using High-strength Steel Reinforcement** Bahram M. Shahrooz, 2011 TRB's National Cooperative Highway Research Program NCHRP Report 679 Design of Concrete Structures Using High Strength Steel Reinforcement evaluates the existing American Association of State Highway and Transportation Officials AASHTO Load and Resistance Factor Design LRFD Bridge Design Specifications relevant to the use of high strength reinforcing steel and other grades of reinforcing steel having no discernible yield plateau. The report also includes recommended language to the AASHTO LRFD Bridge Design Specifications that will permit the use of high strength reinforcing steel with specified yield strengths not greater than 100 ksi. The Appendixes to NCHRP Report 679 were published online. **Guide Specifications for Seismic Isolation Design**, 2010 This edition is based on the work of NCHRP project 20-7 task 262 and updates the 2nd 1999 edition. **Design of Highway Bridges** Richard M. Barker, Jay A. Puckett, 2013-02-04 Up to date coverage of bridge design and analysis revised to reflect the fifth edition of the AASHTO LRFD specifications. Design of Highway Bridges Third Edition offers detailed coverage of engineering basics for the design of short and medium span bridges. Revised to conform with the latest fifth edition of the American Association of State Highway and Transportation Officials AASHTO LRFD Bridge Design Specifications it is an excellent engineering resource for both professionals and students. This updated edition has been reorganized throughout spreading the material into twenty shorter more focused chapters that make information even easier to find and navigate. It also features Expanded coverage of computer modeling calibration of service limit states rigid method system analysis and concrete shear. Information on key bridge types selection principles and aesthetic issues. Dozens of worked problems that allow techniques to be applied to real world problems and design specifications. A new color insert of bridge photographs including examples of historical and aesthetic significance. New coverage of the green aspects of recycled steel. Selected
