Body Language In 40 Days Jesus Enrique Rosas, 2021-07-09 Imagine being able to SEE the emotions intentions and thoughts of everyone like words on a screen Your intuition whispers but its messages are so fleeting that you don't even have time to take them into account during a conversation For example the other person wrinkled their face for an instant Was it out of annoyance or rather something they remembered They also took a deep breath and looked away Are they disagreeing with what you said Why is it that when they say yes to you they seem to be reluctant Just as you can't learn French overnight the same goes for Body Language The difference is that when it comes to French the language doesn't come pre-programmed in your brain so learning it requires effort and time But in the case of body language it is a skill that is already inside you thanks to millions of years of evolution You just have to reactivate it The most common problem is that you want to learn in a short time what all the postures gestures attitudes voice tones distance between people facial expressions mean It's impossible No matter how hard you try that way you will not make progress rather you will get frustrated And there is another thing you need to take into account Some people are able to read your body and voice just by looking at you They may have learned it through studies or they may be the so-called naturals who have mastered it since birth The truth is that at least 1 in 10 people are able to know what you feel and what your intentions are only because your body reveals them to them without you realizing it or being able to do anything about it They just pick up on your signals I felt that for too long I call it Emotional Nakedness They use the information they get from your body to persuade you and sometimes even manipulate you If you're lucky those people who can read you won't have bad intentions But how can you be sure of that Just as important as knowing how to read the Body Language of others is knowing how to control your own It is as important as knowing how to speak Even more so because if you don't want to reveal something with words you just have to keep silent With your body you don't have that luxury So where do you start with your body language studies Here's a method with which you can learn body language step by step at your own pace and from the general to the more specific details Mastering Body Language is the means to make everyone transparent to you Sounds easy
