Rethinking School-University Partnerships Prentice T. Chandler, Lisa Barron, 2021-05-01 Rethinking School University Partnerships A New Way Forward provides educational leaders in K 12 schools and colleges of education with insight advice and direction into the task of creating partnerships In current times colleges of education and local school districts need each other like never before School districts struggle with pipeline recruitment and retention issues Colleges of education face declining enrollment and a shifting educational landscape that fundamentally changes the way that teachers are trained and what local school districts expect their teachers to be able to do It is with these overlapping constraints and converging interests that partnerships emerge as a foundational strategy for strengthening the education of our teachers With nearly 80 contributors from 16 states and Jamaica representing 39 educational institutions the partnerships described in this book are different from the ways in which colleges of education and school districts have traditionally worked with one another In the past these loose relationships centered primarily on student teaching and or field experience placements In this arrangement the relationship was directed towards ensuring that the local schools were amenable to hosting students from the college of education so that the student candidate could complete the requirements to earn a teaching license In our view this paradigm needs to be enlarged and shifted

Handbook of Corporate University Development Dr Scott Taylor, Professor Geoff Peters, Professor John Storey, Professor Rob Paton, 2012-09-01 The emphasis on corporate universities has been a driving force in moving companies beyond a restricted approach to training to a central vision for learning within the organization However there have been failures and many corporate universities have struggled to bring a business rigour to learning or to align their development with the key business and financial drivers of the organization It is time for the Corporate University to demonstrate how business rigour handled deftly and with strong and perceptive leadership can revolutionize learning both inside and outside the organization The Handbook of Corporate University Development is an important catalyst towards this process It draws on experience from around the world to provide anyone responsible for strategy and learning at senior levels in government education and business with a picture of current best practice

Equity-Based Career Development and Postsecondary Transitions Erik M. Hines, Laura Owen, 2022-03-01 Former First Lady Michelle Obama believes that every individual should have some type of postsecondary education or training beyond high school to achieve economic and personal success Reach Higher Initiative Better Make Room 2019 Educational attainment e g a high school diploma college degree or postsecondary training provides career opportunities for advancement into leadership positions and benefits such as health insurance and retirement Heckman 2000 Additionally an individual with a college degree can make over one million dollars more over a lifetime in salary than someone with a high school diploma Carnevale Cheah Hanson 2015 Acquiring a college degree can lead to employment opportunities and is considered an asset in the U S economy Washington 2010 However certain populations encounter

barriers to attaining an education particularly a postsecondary education leading to a disparity in receiving the aforementioned benefits Some of these populations include African American students LGBTQ students and students with disabilities There is a dearth of information and research on providing guidance on implementation research and best practices in equity based career development college readiness and successful postsecondary transitions for minoritized at risk or vulnerable populations The editors of this volume invited authors with research and practice expertise around various student populations in preparing them for college and career readiness as well as postsecondary transitions This book is the first of its kind to discuss career development and postsecondary transitions from an access and equity perspective Further this text serves as a call to action to ensure the United States most vulnerable populations has an opportunity to successfully transition into multiple postsecondary options after high school

Understanding College and University Organization James L. Bess, Jay R. Dee, 2023-07-03 Now available in paperback this two volume work is intended to help readers develop powerful new ways of thinking about organizational principles and apply them to policy making and management in colleges and universities The book is written with two audiences in mind administrative and faculty leaders in institutions of higher learning and students both doctoral and Master s degree studying to become upper level administrators leaders and policy makers in higher education It systematically presents a range of theories that can be applied to many of the difficult management situations that college and university leaders encounter It provides them with the theoretical background to knowledgeably evaluate the many new ideas that emerge in the current literature and in workshops and conferences The purpose is to help leaders develop their own effective management style and approaches and feel confident that their actions are informed by appropriate theory and knowledge of the latest research in the field Without theory organizational leaders are forced to treat each problem that they encounter as unique as if it were a first time occurrence While leaders may have some experience with a particular issue their solutions are usually not informed by the accumulated wisdom of others who have already encountered and resolved similar situations The authors approach the theory of the organization and administration of colleges and universities from three quite different perspectives or paradigms each relying on different assumptions about the reality of organizational life in colleges and universities The positivist paradigm primarily an omnibus systems theory integrates the chapters into a comprehensive yet easily accessible whole Social constructionism the second paradigm is introduced in each chapter to illuminate the difficulty of seeking and finding meaningful consensus on problems and policies while also addressing important ethical issues that tend to be overlooked in leadership thought and action The third paradigm postmodernism draws attention to difficulties of logic and communication under the constraints of strictly linear thinking that authorities at all levels attempt to impose on organizations This multiple

paradigm approach enables readers to become more cognizant of their own assumptions how they may differ from those of others in their organization and how those differences may both create difficulties in resolving problems and expand the range of alternatives considered in organizational decision making The book offers readers the tools to balance the real world needs to succeed in today's challenging and competitive environment with the social and ethical aspirations of all its stakeholders and society at large The authors aim is to elucidate how administration can be made more efficient and effective through rational decision making while also respecting humanistic values This approach highlights a range of phenomena that require attention if the institution is ultimately to be considered successful Also available Volume 1 The State of the SystemTwo volume set **Integrative Approaches to Sustainable Development at University Level** Walter Leal
