Federal Aviation Administration, 1967 **Lighting & Marking of Exit Taxiways** Charles Alexander Douglas, 1978 The problem of lighting exit taxiways has been a long standing one In an effort to resolve it an investigation was made of the feasibility of emphasizing the visibility of the throat of an exit taxiway by means of special lightts The investigation consisted of a review and analysis of the literature The use of green lights installed in the runway surface on the extended taxiway centerline marking is in common use for lighting both high speed and low speed exits This method has not been adopted in the United States because of concern over the possibility of mistaking a low speed exit for a high speed exit Tests to determine if this concern is valid are recommended A system of pulsating blue lights at the entrance to the throat shows promise Tests of this system are recommended Modifying the type L 829 signs located at exits from the runway to increase their conspicuity improved shielding to taxiway edge lights use of asymmetric instead of symmetric lenses on straight stretches dimming of taxiway edge lights would improve the guidance and reduce the sea of blue effect Tests of these modifications are recommended The use of high efficiency retroreflective paint to mark the turn offs to the exit taxiway will improve nighttime guide and is recommended Author Specification for Runway and Taxiway Edge Lights , 1975

Taxiway Lighting United States. Civil Aeronautics Administration, 1958 *Evaluation of an Experimental Elevated High-Intensity Runway Edge Light* E. Leon Reamer, FEDERAL AVIATION ADMINISTRATION WASHINGTON D C SYSTEMS RESEARCH AND DEVELOPMENT SERVICE., 1974 The subject effort was to determine the suitability of a newly designed elevated runway edge light to function in category I and category II operations when a high intensity runway light environment is prevalent The work involved laboratory photometric measurements and analysis of pilot response after test flying the newly designed runway lighting system The results of the tests indicated that the new design concept is appropriate for use under the conditions tested Author **Taxiway Edge Lighting System** , 1972 Method of Elevating Height of Runway and Taxiway Edge Light Fixtures Canada. Transport Canada. Airports & Construction Services Directorate. Airport Facilities Branch, 1981 **Taxiway Edge Lighting System** , 1972 **Runway and Taxiway Edge Lighting System** United States. Federal Aviation Administration, 1977 Evaluation of Taxiway Centerline Lighting Robert

F. Gates, NATIONAL AVIATION FACILITIES EXPERIMENTAL CENTER ATLANTIC CITY NJ., 1964 The report reviews the taxiing problem during low visibility conditions In accomplishing the project comparisons were made among the standard blue taxiway edge lighting taxiway edge reflective markers and taxiway centerline lighting Adequacy of new fixtures 180 cycle regulators and a control system for taxiway centerline lighting was also evaluated A specially prepared Mylar film was used in simulating taxiway centerline light visibilities TCLV of 1500 600 and 200 feet on straight and curved taxiways of differing radii Photometric and environmental tests were conducted over a period of approximately a year and a half on four types of fixtures It was concluded that taxiway centerline lighting was a significant improvement over conventional edge lighting and that aircraft could accurately taxi in visibilities as low as 200 feet over a taxiway centerline lighting system None of the fixtures withstood the environment encountered Taxiway edge reflectors showed promise but further development was recommended No problems were encountered with the 180 cycle regulators and control system It was recommended that a Selection Memorandum for taxiway centerline lighting be prepared by applying the results of this evaluation to fixture configuration and spacing Green was recommended as the color for taxiway centerline lighting to differentiate between it and the white runway centerline lighting
