Solving Problems in Technical Communication Johndan Johnson-Eilola, Stuart A. Selber, 2024-05-31 The field of technical communication is rapidly expanding in both the academic world and the private sector yet a problematic divide remains between theory and practice Here Stuart A Selber and Johndan Johnson Eilola both respected scholars and teachers of technical communication effectively bridge that gap Solving Problems in Technical Communication collects the latest research and theory in the field and applies it to real world problems faced by practitioners problems involving ethics intercultural communication new media and other areas that determine the boundaries of the discipline The book is structured in four parts offering an overview of the field situating it historically and culturally reviewing various theoretical approaches to technical communication and examining how the field can be advanced by drawing on diverse perspectives Timely informed and practical Solving Problems in Technical Communication will be an essential tool for undergraduates and graduate students as they begin the transition from classroom to career

A Scientific Approach to Writing for Engineers and Scientists Robert E. Berger, 2014-05-23 A SCIENTIFIC APPROACH TO WRITING Technical ideas may be solid or even groundbreaking but if these ideas cannot be clearly communicated reviewers of technical documents e g proposals for research funding articles submitted to scientific journals and business plans to commercialize technology are likely to reject the argument for advancing these ideas The problem is that many engineers and scientists entirely comfortable with the logic and principles of mathematics and science treat writing as if it possesses none of these attributes The absence of a systematic framework for writing often results in sentences that are difficult to follow or arguments that leave reviewers scratching their heads This book fixes that problem by presenting a scientific approach to writing that mirrors the sensibilities of scientists and engineers an approach based on an easily discernable set of principles Rather than merely stating rules for English grammar and composition this book explains the reasons behind these rules and shows that good reasons can guide every writing decision This resource is also well suited for the growing number of scientists and engineers in the U S and elsewhere who speak English as a second language as well as for anyone

else who just wants to be understood Resources in Education ,1998 Writing Like An Engineer Dorothy A. Winsor,2013-11-05 Comprised of a study spanning over five years this text looks at four engineering co op students as they write at work Since the contributors have a foot in both worlds work and school the book should appeal to people who are interested in how students learn to write as well as people who are interested in what writing at work is like Primarily concerned with whether engineers see their writing as rhetorical or persuasive the study attempts to describe the students changing understanding of what it is they do when they write Two features of engineering practice that have particular impact on the extent to which engineers recognize persuasion are identified a reverence for data and the hierarchical structure of the organizations in which engineering is most commonly done Both of these features discourage an open recognition of persuasion Finally the study shows that the four co op students learned most of what they knew about writing at work by engaging in situated practice in the workplace rather than by attending formal classes *NASA Technical Memorandum* ,1989 Style and Ethics of Communication in Science and Engineering Jay Dowell Humphrey,Jeffrey W. Holmes,2009 Scientists and engineers seek to discover and disseminate knowledge so that it can be used to improve the human condition Style and Ethics of Communication in Science and Engineering serves as a valuable aid in this pursuit it can be used as a textbook for undergraduate or graduate courses on technical communication and ethics a reference book for senior design courses or a handbook for young investigators and beginning faculty members In addition to presenting methods for writing clearly and concisely and improving oral presentations this compact book provides practical guidelines for preparing theses dissertations journal papers for publication and proposals for research funding Issues of authorship peer review plagiarism recordkeeping and copyright are addressed in detail and case studies of research misconduct are presented to highlight the need for proactive attention to scientific integrity Ample exercises cause the reader to stop and think Style and Ethics of Communication in Science and Engineering thus motivates the reader to develop an effective individual style of communication and a personal commitment to integrity each of which are essential to success in the workplace Table of Contents Motivation Writing Well Scientific Publications Proposals and Grant Applications Oral Communication Authorship Recordkeeping Ownership of Ideas Data and Publications *Guide to the Evaluation of Educational Experiences in the Armed Services: Coast Guard, Marine Corps, Navy, Department of Defense* American Council on Education,1978 **Book Catalog of the Library and Information Services Division: Shelf list catalog** Environmental Science Information Center. Library and Information Services Division,1977 New Media Communication Skills for Engineers and IT Professionals: Trans-National and Trans-Cultural Demands Patil, Arun,Eijkman, Henk,Bhattacharyya, Ena,2012-03-31 The communication demands expected of today s engineers and information technology professionals immersed in multicultural global enterprises are unsurpassed New Media Communication Skills for Engineers and IT Professionals Trans National and Trans Cultural Demands provides new and experienced practitioners academics

employers researchers and students with international examples of best practices in new as well as traditional communication skills in increasingly trans cultural digitalized hypertext environments This book will be a valuable addition to the existing literature and resources in communication skills in both organizational and higher educational settings giving readers comprehensive insights into the proficient use of a broad range of communication critical for effective professional participation in the globalized and digitized communication environments that characterize current engineering and IT workplaces Handbook of Technical Communication Alexander Mehler,Laurent Romary,2012-10-30 The Handbook of Technical Communication brings together a variety of topics which range from the role of technical media in human communication to the linguistic multimodal enhancement of present day technologies It covers the area of computer mediated text voice and multimedia communication as well as of technical documentation In doing so the handbook takes professional and private communication into account Special emphasis is put on technical communication by means of web 2 0 technologies and its standardization in system development In summary the handbook deals with theoretical issues of technical communication and its practical impact on the development and usage of text and speech technologies

Rhetoric, Innovation, Technology Stephen Doheny-Farina,1992 Stephen Doheny Farina shows that the technical and commercial processes of turning technologies into products are in significant ways communication processes Improving the way that technology is transferred from laboratory to marketplace is central to improving American productivity and competitiveness in a global economy In this provocative analysis Stephen Doheny Farina shows that the technical and commercial processes of turning technologies into products are in significant ways communication processes He explores the key role that technical communicators must play in the movement of technology from expert designers and developers to users Several lengthy case studies illustrate the rhetorical issues involved in technology transfers as well as the rhetorical barriers to their success Doheny Farina argues that processes typically called information transfer and technology transfer are not transfers at all but instead are series of personal constructions and reconstructions of knowledge expertise and technologies by the participants attempting to adapt technological innovations for social uses Underscoring the rhetorical nature of any technology transfer the case studies describe the powerful effect that a startup company s business plan can have on its future including the many factors that surround the writing of a business plan the rhetorical barriers to the transfer of an experimental artificial heart from a university research hospital to a biomedical products manufacturer and two compelling situations that call for the inclusion of technical writers in new product development from its inception A final chapter focuses on the important elements in the education of technical communicators and an appendix discusses classroom applications and includes a fictional case incorporating issues of intraorganizational barriers to collaboration in the new product development process **Citizenship and Advocacy in Technical Communication** Godwin Y. Agboka,Natalia Matveeva,2018-06-22 In Citizenship and Advocacy in Technical Communication teachers researchers and practitioners will

find a variety of theoretical frameworks empirical studies and teaching approaches to advocacy and citizenship Specifically the collection is organized around three main themes or sections considerations for understanding and defining advocacy and citizenship locally and globally engaging with the local and global community and introducing advocacy in a classroom The collection covers an expansive breadth of issues and topics that speak to the complexities of undertaking advocacy work in TPC including local grant writing activities cosmopolitanism and global transnational rhetoric digital citizenship and social media use strategic and tactical communication and diversity and social justice The contributors themselves representing fifteen academic institutions and occupying various academic ranks offer nuanced definitions frameworks examples and strategies for students scholars practitioners and educators who want to or are already engaged in a variegated range of advocacy work More so they reinforce the inherent humanistic values of our field and discuss effective rhetorical and current technological tools at our disposal Finally they show us how through pedagogical approaches and everyday mundane activities and practices we can advocate either actively or passively
