

Example format for a technical report on WQM

TITLE

The title should clearly and briefly indicate what the report is about.

Executive Summary

Summarises the report in plain English. The Executive Summary should be able to be read and understood independently of the main body of the report. It is often easiest to write after completing the rest of the report.

1: Introduction

Background to the report, including discussion of previous studies in the area or related studies. The introduction should also clearly outline the reason for the study/report, including objectives and any working hypotheses.

2: Methodology

2.1. Experimental/sampling design

A description of the study area and study design, including detail such as equipment used in field and laboratory work, methodology for selecting sampling sites, field work undertaken and methods of laboratory analysis. For a WQM program this detail needs to include what parameters were tested and any standards and protocols used in the laboratory analysis of samples.

2.2. Data analysis

An outline of how the data obtained from sampling and laboratory analysis were analysed, including details of any statistical tests undertaken and their assumptions and limitations.

3: Results

A description of the results obtained without any explanation or interpretation of them. Visual aids such as graphs, tables and maps may be used to summarise the results. If raw data is to be included in the report, it should be placed in an appendix rather than in the results section.

4: Discussion

The results of the study are interpreted and implications of these results in terms of the project objectives are discussed. A discussion of how the results relate to other studies is also common. An evaluation of the methodology used may also be undertaken.

5: Conclusions

Summarises specific conclusions drawn from the results in terms of the project objectives and working hypotheses.

6: Recommendations

ENGLISH LANGUAGE LABORATORIES NIRA KONAR, 2011-07-30 Today acquiring English language skills has become so essential especially for those who are looking for new jobs in reputed organizations as well as for the practising professionals. Many engineering students even though they have adequate knowledge of their subject are unable to express themselves well in English. Taking this into account engineering colleges/institutes have introduced exclusive English Language Laboratories where students are drilled in the practical aspects of the English language. This compact and comprehensive book is a step by step practical guide to students telling them how to prepare technical reports and how to acquire the basic communication skills: listening, speaking, reading and writing. The book deals with conversation, situational dialogues and role plays and Group Discussions (GDs). It also gives detailed discussion about Interviews: step by step preparation, practical and psychological preparation, the dos and don'ts for interview, besides dealing with different kinds of interviews: telephonic, videoconferencing and others. In addition, the text stresses the importance of researching the organization and salary negotiations. Finally, the book shows the students how to make powerpoint presentations (PPTs): the structure of presentation and using audio visuals. This activity based, skill oriented, learner centred book is designed according to the WBUT syllabus on Technical Report Writing and Language Laboratory Practice for the B.Tech students. However, it would be equally useful for B.Tech/B.E. students across the country.

DISTINGUISHING FEATURES A practical and student friendly text, the stress being on the functional aspects of the language and various activities for acquiring the language. Gives the Methodology of conducting activities such as GDs, Interviews and Presentation. Provides model GD topics and the step by step process of making PPTs. Clearly spells out all the details right from preparing a good job application, researching the company including its financial health, to preparing the job portfolio, to wearing the proper dress, handling questions and negotiating salary. Provides an extensive list of probable questions along with their answers to prepare students for mock interviews. Also gives well crafted questions at the end of each lesson.
