Switching Systems in Telecommunication Networks dr. eng. Alexandru Rusu-Casandra, dr. eng. Marius-Constantin Vochin, dr. eng. Lucian Gabriel Ioan, 2019-05-15 Switching and routing are two types of procedures having the same fundamental purpose which is transferring information between different users of communication networks But while routing must be viewed at the overall level of the communication network the information being exchanged between network nodes switching refers to operations involving a single communication node the information being transferred between its input output access ports It should also be noted that the routing is executed according to a routing protocol used on the network while the switching is based on elements belonging to a single node in the network namely its switching structure routing table and path selection algorithm between ports
