Gadea,J. Muñoz Masqué,2001-10-31 A famous Swiss professor gave a student s course in Basel on Riemann surfaces After a couple of lectures a student asked him Professor you have as yet not given an exact de nition of a Riemann surface The professor answered With Riemann surfaces the main thing is to UNDERSTAND them not to de ne them The student s objection was reasonable From a formal viewpoint it is of course necessary to start as soon as possible with strict de nitions but the professor s swer also has a substantial background The pure de nition of a Riemann surface as a complex 1 dimensional complex analytic manifold contributes little to a true understanding It takes a long time to really be familiar with what a Riemann s face is This example is typical for the objects of global analysis manifolds with str tures There are complex concrete de nitions but these do not automatically explain what they really are what we can do with them which operations they really admit how rigid they are Hence there arises the natural question how to attain a deeper understanding One well known way to gain an understanding is through underpinning the d nitions theorems and constructions with hierarchies of examples counterexamples and exercises Their choice construction and logical order is for any teacher in global analysis an interesting important and fun creating task
