**Business Groups and Financial Markets** Sandro Segre,2017-07-12 This work builds on the classical sociological contributions of Weber Simmel and Toennies and makes the case for different and alternative ideal typical models of business relations which the author calls English and German The English model of business relations is characterized by free competition between firms They abide by the ethical rules of fair business and the moral economy in market exchanges Their relations are accordingly based on mutual trust As a rule they do not cultivate privileged relations with political authorities By contrast the German model involves hierarchical relations between a group s major firm and its smaller units There is no moral community binding together the different groups and therefore no mutual trust between them Business groups maintain close relations based on reciprocal favours with authorities The author compares the London and New York Stock Exchanges in the late nineteenth century finding the former better approximates the English model and shows this model s superior performance English model countries such as Taiwan have been shown to be more competitive in market exchanges than countries such as South Korea which approximate the German model A new epilogue makes use of more recent information and confirms Segre s arguments      **A Weberian Analysis of Business Groups and Financial Markets** Sandro Segre,2017-11-30 Moral economy as a set of rules which regulate market transactions has been the object of much research and debate since the 1980s it has also been the focus of classical sociological authors such as Weber

Simmel and Toennies Weber in particular examined the rules of the moral economy in the financial markets and this volume sheds light on his contribution to the subject The book formulates two models of business relations one oligopolistic model the other based on free competition which are derived from Weber and Simmel s writings and which represent alternative instances of the moral economy Empirical case studies in the form of South Korea and Taiwan are included to exemplify the two models and to highlight the consequences of adopting one model over the other The volume also examines the conduct of actors in some of the leading financial markets with reference to Weber s writings on the 19th century London and Berlin Stock Exchanges      Multinational Corporations and the Emerging Network Economy in Asia and the Pacific Juan J.
