Inadomi, 2010-01-01 For developing countries a stable and secure supply of electricity is crucial for development and for their populations well being Since the early 1990s the main mechanism for constructing power generation facilities in developing countries has been the independent power project IPP model where a foreign investor enters into long term investment contracts with the national utility This model has succeeded in attracting investment but raises complex regulatory and contractual challenges in addition to public concerns This book drawing on project contracts the author's interview sources case law and literature analyzes in detail the legal investment protection used by IPP investors to ensure sufficient returns and protect their contracted revenue stream The author examines how the model's corporate financial structure interlocks with strong contractual rights and with a number of measures used to improve the host country's creditworthiness in the short and long term including investment guarantees The second part of the book identifies that the IPP model normally leads to six main consequences for the host developing country The IPP model has led to private investment which has increases reliability modernization and introduced private standards It contains an intrinsic structural weakness in times of economic downturns It has shown a tendency to lead to overinvestment in generation capacity It has shown a tendency to lead to expensive and suboptimal solutions regarding choice of design and technology The model and its institutional surroundings contains insufficient disincentives against moral hazard and exploitative behavior including corruption and The IPP model does not facilitate a further development of the host country's power sector The author argues that these consequences for development can be improved without detrimentally compromising the private sector's willingness to continue to invest While pursuing this analysis the author also explores such issues as the following the web of parties and contracts constituting the IPP model including the model's risk allocation an analysis of political risk including to what extent foreign investors also are protected against commercial and credit risks the competing needs of predictability and flexibility in long term contracts how investment arbitration tribunals have reacted both to the change in macroeconomic circumstances caused by the East Asian Crisis of 1997-98 and to numerous and credible allegations of corruption during procurement identification of factors reducing or increasing the IPP model's tendency to fail during severe economic recessions **Entwicklung eines Leitfadens für kooperative Terminsteuerung in Bauprojekten** Rodde,

Nina, 2020-05-20 Bauverträge sind besondere Verträge und stellen damit hohe Anforderungen an die Vertragspartner Die Errichtung des Bauwerks erfordert zumeist mehrere Jahre Gerade zum Vertragsschluss steht oftmals nicht ganz genau fest wie das fertige Objekt aussehen wird Folglich sind Änderungen meist nicht zu vermeiden Die Einmaligkeit der Produkte und die vielen Risiken die auch bei noch so umsichtiger Planung nicht vollends beherrschbar sind erfordern eine hohe

Kooperationsbereitschaft der Beteiligten um die Probleme konstruktiv und möglichst ohne Zeitverzögerung für die Baustelle zu lösen. Denn Zeit ist Geld, dies gilt ganz besonders für komplexe Großprojekte. Die Teammitglieder auf Auftraggeber, Unternehmer und auch Planerseite sind gefordert, die Termineinhaltung gemeinsam sicherzustellen bzw. unvermeidbare Verzögerungen so gering wie möglich zu halten. Die aktuell geschlossenen Verträge führen die Partner jedoch oftmals in konfrontative Situationen, in welchen jeder auf seine Interessen schaut und Anspruchsicherung betreibt, anstatt Lösungen zu suchen. Mit einem Blick ins Ausland auf andere bereits erfolgreich praktizierte Vertragsmodelle werden in dieser Arbeit Lösungsansätze für dieses Dilemma entwickelt. Mit einer konstellationsgerechten Auswahl der Maßnahmen und deren verschiedenen Einsatzmöglichkeiten lassen sich auch im bestehenden deutschen Vergabe- und Vertragssystem zwischen BGB, VOB und neuem Bauvertragsrecht zwei- oder Mehrparteienverträge konzipieren, die die Zusammenarbeit in den Fokus stellen und hierzu positive Anreize setzen. Dies wirkt sich folgendermaßen auf alle Aspekte der gemeinsamen Vertragsabwicklung aus. Ein besonderes Augenmerk dient jedoch der Terminsteuerung und fokussierten Reaktion auf Terminabweichungen, bestenfalls im Vorfeld, aber auch bei bereits eingetretenen Störungen. Der Einsatz eines Terminmanagers fokussiert die Projektbeteiligten auf die terminliche Situation des Projektes sowie die terminlichen Auswirkungen ihrer Entscheidungen. Ist der Terminmanager Mitglied einer Core Group vgl. PPC200 oder eines Management Teams, Australian Alliancing Contract, findet die terminliche Komponente Eingang in die gemeinsamen Entscheidungen des Projektteams bei Eintritt von Störungen und bei der Bewertung von Risiken. Auf der Basis von Vertrauen kann die gemeinsame Projektenergie statt auf die Sicherung eigener Ansprüche ganzlich in die Interessen des Projektes einfließen. Mit dem gemeinschaftlichen Knowhow in der Auseinandersetzung über die Sachfragen des Projekts werden die Risiken und Störungen im Projekt früher sichtbar, umfassend behandelt und oftmals vor Eintritt aufgelöst werden können. Die unvermeidbaren Störungen können durch geschickte Maßnahmen in ihrer Wirkung vermindert werden. Gegenseitige Vorwürfe werden vermieden, da sich alle auf die gemeinsamen Ziele fokussieren. So erreicht das Team eine hohe Motivation und geradezu automatisch mehr Terminalsicherheit im Projekt. Building contracts are particular contracts and place particular demands on the contracting parties. The construction of a building usually takes several years. At the time of signing the contract it is often not yet clear what exactly the finished object will look like. Consequently, changes are generally unavoidable. The uniqueness of products and numerous risks, which cannot be fully controlled even with utmost care in planning, require a high degree of cooperativeness by all parties for resolving issues constructively and ideally without delays for the construction site. After all, time is money, especially for complex large-scale projects. All team players, clients, contractors and planners are called upon to ensure that deadlines are met by joint effort and to keep unavoidable delays to a minimum. However, the contracts concluded nowadays often take the partners into confrontational situations where everyone focuses on their own interests and on securing claims rather than seeking solutions. By looking across national borders at other successful contract models, this paper develops approaches to

solving this dilemma With a constellation oriented selection of measures and their various possible applications it is possible to develop two or multi party contracts even under the existing German procurement and contract system between the German Civil Code BGB construction contract procedures VOB B and the new building contract law which focus on cooperation and provide positive incentives for this This will have beneficial effects on all aspects of joint contract management Special attention is paid to schedule control and focused response to schedule deviations preferably in advance but also in case of delay events The appointment of a scheduling manager focuses all parties on the project scheduling situation and on the implications of their decisions on deadlines If the scheduling manager is a member of a core group of PPC 2000 or a management team Australian Alliance Contracting the scheduling component is integrated into the joint decisions of the project team in case of delay events and in risk assessment On a basis of trust the joint project energy can be channelled fully into the interests of the project instead of securing own claims Using the joint know how in discussing the technical aspects of the project will help to identify risks and delays earlier deal with them effectively and often resolve them before they even occur The impact of inevitable delays can be minimised by skilful measures Rather than blaming each other everyone will focus on the common goals As a result the team will be highly motivated and the project schedule will automatically be more reliable

Risikomanagement in Projekten James R. Pinnells,Eleanor Pinnells,2009-09-30 Es kommt selten vor dass ein Vater Tochter Team ein Fachbuch schreibt Auf einem Gebiet wie dem Risikomanagement ist der Versuch vielleicht sogar einmalig Als Mitautoren haben wir aber die Erfahrung gemacht dass aus der Kombination von jugendlicher Bereitschaft alles in Frage zu stellen und der vorsichtigeren Stimme der Erfahrung eine kreative Spannung entsteht Das daraus resultierende Buch stellt f r den Praktiker eine wertvolle Fallsammlung dar eine Situation wird geschildert Fragen werden formuliert und Antworten vorgeschlagen Ein theoretischer Rahmen wird nat rlich auch vorgestellt Risikomanagement ist aber keine exakte Wissenschaft nach angels chsischem Verst ndnis ist die Theorie durchweg an der Praxis orientiert Viele Personen die meisten davon Projektmanager haben einen Beitrag zu diesem Buch geleistet Wenn man die einzelnen F lle liest ist uns aber immer noch unklar ob wir eher unsere Dankbarkeit f r die Beitr ge oder mehr unser Mitleid mit dem Erlebten ausdr cken sollten Am besten ist wohl beides Besonders verpflichtet sind wir Anna Deppenkemper Von Anfang an hat sie mit Enthusiasmus Treffsicherheit und Humor unsere Bestrebungen Projektrisiken zu identifizieren und risikobegrenzende Strategien zu entwickeln begleitet Sie hat jedes Wort das wir geschrieben haben zweimal mindestens gelesen und vielleicht die H lfte davon scharf kommentiert Anna hat selbst neulich eine wissenschaftliche Arbeit mit dem Titel Managing Project Risks in International Investment Projects geschrieben Ohne ihre Hilfe w re unser Werk viel rmer

Practical Guide to Engineering and Construction Contracts Philip Loots,Donald Charrett,2009-09 **The Comparative Law Yearbook of International Business** Christian Campbell,2020-03-23 Conflict avoidance and resolution have always been primary purposes of the law Satisfaction with judicial processes has declined in many jurisdictions After the diversion of

many disputes from courts to arbitral tribunals arbitration has now also become a target of intense criticism This dissatisfaction with binding third party adjudication of disputes coincides with rising tensions among citizens asking basic questions about what they can expect from each other and their governments in a constantly changing world One response has been the proliferation of processes between disputing parties that are structured and interactive negotiation and assisted by a neutral third party using specialized negotiation and communication techniques These processes have been labelled mediation While mediation is not focused on the identification and application of legal rights and duties in the way that adjudication is its success remains dependent on a legal framework which is still evolving in most jurisdictions and especially across borders In this edition of the Comparative Law Yearbook of International Business lawyers from nine jurisdictions examine developments relating not only to the framework for cross border mediation such as the Singapore Convention or inter State disputes or relating to their countries overall approaches to regulating this method of dispute resolution but also relating to specific issues such as mediator ethics and conflicts of interest and even exploring the neural science of conflict dynamics

Contracts for Construction and Engineering Projects Donald Charrett, 2021-12-22 Contracts for Construction and Engineering Projects provides unique and invaluable guidance on the role of contracts in construction and engineering projects. The work explores various aspects of the intersection of contracts and construction projects involving the work of engineers and other professionals engaged in construction whether as project managers, designers, constructors, contract administrators, schedulers, claims consultants, forensic engineers or expert witnesses. Compiling papers written and edited by the author, refined and expanded with additional chapters in this new edition, this book draws together a lifetime of lessons learned in these fields and covers the topics a practising professional might encounter in construction and engineering projects developed in bite-sized chunks. The chapters are divided into five key parts: 1 The engineer and the contract, 2 The project and the contract, 3 Avoidance and resolution of disputes, 4 Forensic engineers and expert witnesses, and 5 International construction contracts. The inclusion of numerous case studies to illustrate the importance of getting the contract right before it is entered into and the consequences that may ensue if this is not done makes this book essential reading for professionals practising in any area of design, construction, contract administration, preparation of claims or expert evidence as well as construction lawyers who interact with construction professionals. **Construction Law** Julian Bailey, 2016-10-04 Now in its second edition, Construction Law is the standard work of reference for busy construction law practitioners and it will support lawyers in their contentious and non-contentious practices worldwide. Published in three volumes, it is the most comprehensive text on this subject and provides a unique and invaluable comparative multi-jurisdictional approach. This book has been described by Lord Justice Jackson as a tour de force and by His Honour Humphrey Lloyd QC as seminal and definitive. This new edition builds on that strong foundation and has been fully updated to include extensive references to very latest case law as well as changes to statutes and regulations. The laws of Hong Kong and Singapore are also now covered in detail in addition to those of England and Australia. Practitioners as well as interested academics and postgraduate students will all find this book to be an invaluable guide to the many facets of construction law.
