Chung, Satesh Narayana Namasivayam, Mohammad Hosseini Fouladi, 2019-02-06 This book explains how Taylor's University implemented a curriculum in their engineering program that prepares students to address challenges facing the world. Aim is to enable Engineers put their knowledge into application to meet the 14 challenges of the century as outlined by the National Academy of Engineering NAE of the United States. The research groups are organized around the 14 grand challenges for engineering. The structure of their syllabi is organized in a way that they address the 5 core competencies: Research Experience, Entrepreneurship, Service Learning, Interdisciplinary Curriculum, Global Dimension. It uses the CDIO educational framework, a project-based learning approach that provides students with the big picture of engineering. Through this method, students are able to Master a deeper working knowledge of the fundamentals of engineering, Lead in the creation and operation of new products and systems, Understand the importance and strategic value of research work. As the only programme of its kind outside North America, it offers the brightest minds the opportunity to face real-world issues and places them on the cutting edge of the engineering world.

**Assessment for Learning Within and Beyond the Classroom** Siew Fun Tang, Loshinikarasi Logonnathan, 2016-06-29 These conference proceedings focus on Assessment for Learning Within and Beyond the Classroom in recognition of the power of assessment for learning as a way of boosting student performance. They explore the breadth, depth, and quality of the best models and practices, strategies, lessons learnt, and discuss cases of successful implementation of assessment within the classroom and beyond, including the virtual space. They also provide fertile ground for stimulating and comparing responsive assessment approaches and practices in relatively new areas of assessment, such as graduate capability assessment, in view of the need for educational institutions to evidence graduate employability.

**Implementing Communities of Practice in Higher Education** Jacquie McDonald, Aileen Cater-Steel, 2016-11-23 In this edited collection, the authors pick up the communities of practice (CoP) approach of sharing practice in their reflection on the experience of taking their CoP vision from a dream to reality. Their stories articulate the vision, the passion, and the challenge of working within and/or changing existing institutional culture and practice. The book discusses strategies that worked and considers the lessons learnt to inspire future dreamers and schemers. The multiple perspectives provided in the case studies will assist higher education leaders as well as academic and professional staff in establishing or assessing CoPs. The book offers insights into implementation strategies, practical guidelines, and ideas on how CoP theoretical underpinnings can be tailored to the higher education context.
