[Environmental Management Accounting and Supply Chain Management](#) Roger L. Burritt, Stefan Schaltegger, Martin Bennett, Tuula Pohjola, Maria Csutora, 2011-05-19. This volume's focus on the environmental accounting of supply chain processes is of particular relevance because these processes supply data about the environmental impact of relationships between business organisations, an area where the boundary separating internal and external accounting is ill defined. Here contributors advocate what they term accounting for cooperation as a more environmentally positive complement to the paradigmatic practice of accounting for competition.
