Data Analytics for Management, Banking and Finance Foued Saâdaoui, Yichuan Zhao, Hana Rabbouch, 2023-09-19 This book is a practical guide on the use of various data analytics and visualization techniques and tools in the banking and financial sectors. It focuses on how combining expertise from interdisciplinary areas such as machine learning and business analytics can bring forward a shared vision on the benefits of data science from the research point of view to the evaluation of policies. It highlights how data science is reshaping the business sector. It includes examples of novel big data sources and some successful applications on the use of advanced machine learning, natural language processing, networks analysis and time series analysis and forecasting among others in the banking and finance. It includes several case studies where innovative data science models are used to analyse test or model some crucial phenomena in banking and finance. At the same time, the book is making an appeal for a further adoption of these novel applications in the field of economics and finance so that they can reach their full potential and support policy makers and the related stakeholders in the transformational recovery of our societies. The book is for stakeholders involved in research and innovation in the banking and financial sectors but also those in the fields of computing, IT and managerial information systems helping through this new theory to better specify the new opportunities and challenges. The many real cases addressed in this book also provide a detailed guide allowing the reader to realize the latest methodological discoveries and the use of the different Machine Learning approaches: supervised, unsupervised, reinforcement, deep etc. and to learn how to use and evaluate performance of new data science tools and frameworks.

From the Great Depression to the 2008 Global Financial Crisis: Systemic Flaws in Investment Financing Seif I. Tag el-Din, *Indian Financial System* Dr. Samrat Das, Dr. Chetana M R & Mrs. Mamatha C N, 2025-09-16 The Indian Financial System (IFS) is a well-structured network of institutions, markets, instruments and services that facilitate the flow of funds within the economy. It plays a vital role in mobilizing savings from households and channeling them towards productive investments, thereby supporting economic growth and development. The system ensures an efficient allocation of financial resources by bridging the gap between surplus and deficit units in the economy. The IFS is broadly divided into two components: the formal sector and the informal sector. The formal sector comprises organized financial institutions such as commercial banks, cooperative banks, non-banking financial companies, NBFCs, insurance companies, mutual funds and regulatory bodies like the Reserve Bank of India (RBI) and the Securities and Exchange Board of India (SEBI). The informal sector includes moneylenders, indigenous bankers and other unregulated entities. Key financial markets including the money market, capital market and foreign exchange market operate within this system to provide liquidity and investment opportunities. Financial instruments such as shares, debentures, bonds and derivatives further support these operations.
