## **Force 2025 And Beyond Arcic:**

Military Review ,2015

**Transformation of the Indian Armed Forces: 2025** Maj Gen A K Lal (Retd),2012-05-09

Transformation should lie at the heart of our new approach to defense The development of transformational capabilities processes and force structures should be given strategic focus to meet the principal challenges under our defense strategy India is already ceased with the necessity of transformation albeit without any documented national security guidelines or operating instructions which are legislated or have the validation of at least the Cabinet Committee on Security CCS In other words the first step would be to create a draft security strategy based on many assumptions like the foreign policy or the cumulative emerging threat scenario as appreciated by the Defence Intelligence Agency DIA This well researched book is a result of the project allotted by the USI under the Field Marshal K M Cariappa chair The book is therefore more as an idea or a theoretical construct basically to bring in more clarity to the various options available for this great transformation of the Indian military The author has deliberated upon various landmarks of transformation milestones achieved so far by the three services and given recommendations to further build upon ongoing modernization plan and shift to a higher plane of transformational activities Professional Journal of the United States Army ,2015

## **Global Strategic Developments**

The Emirates Center for Strategic Studies and Research,2012-06-19 The world today faces numerous challenges including the ongoing fallout from the financial crisis and varied and diverse examples of violence and conflict across the globe Combined with the many changes affecting both the regional and global balance of power such as the apparent decline of the United States the growing influence of the East and the evolving role of international organizations these challenges have led some to question how global power will be distributed in the coming two decades All nations are exposed to the influences of international policy and ongoing developments in the world order Understanding these developments as well as the associated implications for international security and stability enables national policy makers to identify and capitalize on strategic opportunities A future strategic vision for the Gulf must encompass a range of issues including internal regional and global aspects The states of the region must develop stronger domestic resilience by binding citizens to the state in a way that reduces its vulnerability to malign transnational forces Gulf states will wish to further deepen their links to the countries of the East particularly states such as South Korea Japan Australia China and India all of whom have different ways that they can contribute to regional stability They may also wish to be exporters rather than merely importers of security contributing to international missions authorized by the UN and other international bodies States that have this sense of international social responsibility become more vital to the global system as a whole The GCC states will also wish to revive and increase the flexibility of their regional security apparatus perhaps to engage Iran Iraq and Yemen and gain more control of immediate regional dynamics Driving regional security in this way will partly insulate the GCC countries from the diplomatic initiatives of others that may not be consistent with GCC interests Furthermore the GCC states will seek to build stronger

institutional links among themselves deepening the co operation and contacts between the civil servants of the member countries so that diplomacy between them is derived from disciplined organizational procedures Just as each state has to develop its domestic resilience so through institution building should the GCC strengthen its corporate resilience Overall the Gulf states need to develop an increasingly global outlook even as they deal with internal challenges They must find more ways to engage productively in the broader security dialogue of the region with outside actors from Europe North America and Asia In the age of globalization the states of the region need to be very mindful of the place good governance has in ensuring that the rest of international society is able to effectively engage with the Gulf states

**Small States and the New Security Environment** Anne-Marie Brady, Baldur Thorhallsson, 2020-11-23 This book examines the security defence and foreign policy choices and challenges of small states in NATO and its small partner states in the new security environment The main aim of the book is to analyse how these states are dealing with current and emerging security challenges and how they might better prepare for these challenges A special focus is on new security threats and solutions such as drones and hybrid warfare Simultaneously the book focusses on how small states are responding to emerging old threats such as Russian aggression in its neighbouring states and increased activity in the North Atlantic The book makes an attempt to answer questions like How are the small states of NATO and its small partner states adjusting to the new geo political and geo economic environment Do small states in NATO manage the tension between alliance commitments differently from small states that are not members of NATO What are the core strategic interests of the NATO and non NATO partner small states The book is about the external dimension of inherent size related difficulties in states and how small states compensate for

their inbuilt structural weaknesses compared with their larger neighbouring states One third of the member states of NATO are small and most NATO partner states are small states too Small states frequently have a disproportionate effect on global politics and they are more often affected by global shifts of power yet they have less resources available to address security challenges The aim of the book is to enhance the understanding of the role of small states in the changing global international security environment The book presents the theory of shelter which is derived from the diverse and extensive literature on small states and uses it to examine how small states respond to new and old security threats Shelter theory addresses three interrelated issues of common concerns to small states the reduction of risk before a possible crisis event assistance in absorbing shocks in times of crises and help in recovering after such an event In short shelter theory claims that small states need external shelter in order to survive and prosper They are dependent on the economic political and societal shelter provided by larger states as well as regional and international organizations

**The Security of Iceland and the Arctic 2030** Robert P. Wheelersburg, 2022-03-16 This book outlines a recommended Icelandic security force as part of the country's defence against sub strategic threats such as human trafficking by criminals or border incursions by other states It also tests the recommended security force through the development of four different hypothetical scenarios in the year 2030 designed to show the force's successful implementation Melting of the Arctic ice pack and the opening of the Transpolar Sea Route around 2025 could lead to an increase in traffic into the North Atlantic from the Pacific and vice versa That movement is predicted to bring a massive influx of tourists business interests and government entities into the region Along with legitimate uses of the new shipping lanes the opportunity for terrorists criminals and rogue states to travel in and around the Arctic could lead to increased smuggling violence and sovereignty disputes i.e. seizing uninhabited terrain A review of Iceland's current security policies indicates that the parliament provided the legal framework to create the recommended security force with the 2016 Parliamentary Resolution establishing a National Security Policy for Iceland Many scholars and government officials believe that the Iceland public would not support a security force culturally Yet recent surveys reveal that many Icelanders could accept a security force to protect them from sub strategic threats especially if the increased security could be attained without the intervention of foreign military forces The recommended security force utilizes Icelandic search and rescue volunteers and Reservists to increase the protection of the country funded by its full NATO contribution

**The Greatest Naval War Ever Fought** Vincent O'Hara, 2025-10-14 The greatest naval conflict in history occurred during World War II from 1939 to 1945 Most people are familiar with the famous Battle of the Atlantic and epic naval engagements in the Pacific like Midway and Leyte Gulf all of which receive ample coverage in this panoramic work However author Vince O'Hara offers a truly global perspective of World War II at sea that captures every aspect of a vast naval conflict that involved dozens of nations more than 15 000 ships and 43.7 million tons of shipping Approximately 570 000 lives were lost at sea in those six years Here the naval action begins in the Baltic Sea before dawn on September 1 1939

when a German battleship opened fire on Polish troops barricaded in a fortress in the port city of Danzig Poland Over the ensuing nine months the conflict spread into Great Britain s home waters of the North Sea the English Channel and the eastern Atlantic One of the most remarkable naval achievements of the war occurred in 1940 during the German invasion of Norway The Kriegsmarine s successful attack in the face of immensely superior Allied naval forces was the war s first large scale amphibious operation As naval activities in Europe expanded into the Mediterranean the war in the Pacific exploded with the Japanese attack on Pearl Harbor in December 1941 That assault led to a series of critical naval battles between Japan and the United States including Wake Island Coral Sea Midway and Guadalcanal O Hara not only deftly examines all the major naval contests in the European and Pacific theaters but also offers detailed analysis of secondary navies such as France Italy and the Soviet Union He explores little known smaller engagements such as the campaigns between Thailand and France or Per and Ecuador O Hara connects this broad range of naval action by focusing on recurring themes of technological innovation command and control logistics and intelligence He demonstrates that there was more than one path to winning sea power and that the most important naval platforms to emerge from the war were the oiler the Landing Ship Tank LST and the Liberty ship not the aircraft carrier the submarine or the battleship O Hara makes clear to readers that the impact of the naval battles won by the Allies still reverberates today
