Complexity Economics Koenraad Verboven, 2020-11-25 Economic archaeology and ancient economic history have boomed the past decades The former thanks to greatly enhanced techniques to identify collect and interpret material remains as proxies for economic interactions and performance the latter by embracing the frameworks of new institutional economics Both disciplines however still have great difficulty talking with each other There is no reliable method to convert ancient proxy data into the economic indicators used in economic history In turn the shared

cultural belief systems underlying institutions and the symbolic ways in which these are reproduced remain invisible in the material record This book explores ways to bring both disciplines closer together by building a theoretical and methodological framework to evaluate and integrate archaeological proxy data in economic history research Rather than the linear interpretations offered by neoclassical or neomalthusian models we argue that complexity economics based on system theory offers a promising way forward Turkish Ecocriticism Sinan Akilli, Serpil Oppermann, 2020-12-10 Turkish Ecocriticism From Neolithic to Contemporary Timescapes explores the values perceptions and transformations of the environment ecology and nature in Turkish culture literature and the arts Through these themes it examines historical and contemporary environmentally engaged literary and cultural traditions in Turkey The volume re imagines Turkey in its geo social and ecocultural narratives of multiple connections and complexities in its multi faceted webs of histories and in its rich multispecies stories Towns, Ecology, and the Land Richard T. Varanasi Mahesh Gogate, 2023-06-16 This book on urban water bodies catchment areas and drainage pattern is set against the backdrop of the unprecedented heavy rainfall that severely deluged metropolitan cities and other parts of India in recent years The recurring natural catastrophes in water stressed cities of India and alarming rate of diminishing water bodies wetlands and catchment areas needs a re visit to an entire urban water cycle This book thus discusses how the processes and implementation of colonial urban development policies and projects have radically transformed the water bodies and their catchment areas traditional water holding systems of Varanasi city In this imperative colonial process through the case study of Varanasi the book mainly engages with the reasons behind the elimination of the temple tanks and ponds after the annexation of Varanasi by the British from 1775 till 1947 The book investigates the colonial notion of dry city and how this notion crafted the process of separating land and water bodies which arguably resulted in the reclamation and draining of water bodies and also gave rise to water pollution Additionally the book analyzes the elimination of water bodies and loss of catchment areas through the ongoing processes of restoring the ancient city's natural and cultural heritage Print edition not for sale in South Asia India Sri Lanka Nepal Bangladesh Pakistan and Bhutan **Bird versus Bulldozer** Audrey

Mayer, 2021 An examination of the struggle to conserve biodiversity in urban regions told through the story of the threatened coastal California gnatcatcher A well written and thoroughly researched book Provides a detailed examination of the struggle to conserve biodiversity in urban areas Susan Catherine Cork *Conservation Biology* The story of the threatened coastal California gnatcatcher is a parable for understanding the larger ongoing struggle to conserve biodiversity in regions confronted with intensifying urban development Because this gnatcatcher depends on vanishing coastal sage scrub in Southern California it has been regarded as a flagship species for biodiversity protection since the early 1990s But the

uncertainty of the gnatcatcher's taxonomic classification and whether it can be counted as a listable unit under the Endangered Species Act has provoked contentious debate among activists, scientists, urban developers and policy makers. Synthesizing insights from ecology, environmental history, public policy analysis and urban planning as she tracks these debates over the course of the past twenty-five years, Audrey L. Mayer presents an ultimately optimistic take on the importance of much neglected regional conservation planning strategies to create sustainable urban landscapes that benefit humans and wildlife alike.

Landscape Is...! Gareth Doherty, Charles Waldheim, 2025-02-24. *Landscape Is* examines the implicit biases and received meanings of landscape. Following on from the previous publication *Is Landscape* which examined the plural and promiscuous identities of the landscape idea, this companion volume reflects upon the diverse and multiple meanings of landscape as a discipline, profession and medium. This book is intended for academics, researchers and students in landscape architecture and cognate disciplines. Chapters address various overlooked aspects of landscape that develop, disturb and diversify received understandings of the field. Framed as an inquiry into the relationship of landscape to the forms of human subjectivity, the book features contributions from leading voices who challenge the contemporary understandings of the field in relation to capital and class, race and gender, power and politics and more.

Reimagining Sustainable Cities Stephen M. Wheeler, 2021-12-07. A cutting-edge, solutions-oriented analysis of how we can reimagine cities around the world to build sustainable futures. What would it take to make urban places greener, more affordable, more equitable and healthier for everyone? In recent years, cities have stepped up efforts to address climate and sustainability crises. But progress has not been fast enough or gone deep enough. If communities are to thrive in the future, we need to quickly imagine and implement an entirely new approach to urban development, one that is centered on equity and rethinks social, political and economic systems as well as urban designs. With attention to this need for structural change, *Reimagining Sustainable Cities* advocates for a community-informed model of racially, economically and socially just cities and regions. The book aims to rethink urban sustainability for a new era. In *Reimagining Sustainable Cities*, Stephen M. Wheeler and Christina D. Rosan ask big picture questions of interest to readers worldwide: How do we get to carbon neutrality? How do we adapt to a climate-changed world? How can we create affordable, inclusive and equitable cities? While many books dwell on the analysis of problems, *Reimagining Sustainable Cities* prioritizes solutions-oriented thinking, surveying historical trends, providing examples of constructive action worldwide and outlining alternative problem-solving strategies. Wheeler and Rosan use a social ecology lens and draw perspectives from multiple disciplines. Positive, readable and constructive in tone, *Reimagining Sustainable Cities* identifies actions ranging from urban design to institutional restructuring that can bring about fundamental change and prepare us for the challenges ahead.

Ancient Mesoamerican Population History Adrian S.Z. Chase, Arlen F. Chase, Diane Z. Chase, 2024-05-07. Establishing ancient population numbers and determining how they were distributed across a landscape over time constitute two of the most pressing problems in archaeology. Accurate population

data is crucial for modeling interpreting and understanding the past Now advances in both archaeology and technology have changed the way that such approximations can be achieved Including research from both highland central Mexico and the tropical lowlands of the Maya and Olmec areas this book reexamines the demography in ancient Mesoamerica Contributors present methods for determining population estimates field methods for settlement pattern studies to obtain demographic data and new technologies such as LiDAR light detecting and ranging that have expanded views of the ground in forested areas Contributions to this book provide a view of ancient landscape use and modification that was not possible in the twentieth century This important new work provides new understandings of Mesoamerican urbanism development and changes over time Contributors Traci Ardren M Charlotte Arnauld B rbara Arroyo Luke Auld Thomas Marcello A Canuto Adrian S Z Chase Arlen F Chase Diane Z Chase Elyse D Z Chase Javier Estrada Gary M Feinman L J Gorenflo Julien Hiquet Scott R Hutson Gerardo Jim nez Delgado Eva Lemonnier Rodrigo Liendo Stuardo Jos Lobo Javier L pez Mej a Michael L Loughlin Deborah L Nichols Christopher A Pool Ian G Robertson Jeremy A Sabloff Travis W Stanton **Routledge**
