Carr, 2017-01-05 This book is open access under a CC BY NC 2.5 license This book offers a devastating look at deeply flawed development processes driven by international finance African governments and the global consulting industry It examines major river basin development underway in the semi arid borderlands of Ethiopia Kenya and South Sudan and its disastrous human rights consequences for a half million indigenous people The volume traces the historical origins of Gibe III megadam construction along the Omo River in Ethiopia in turn enabling irrigation for commercial scale agricultural development and causing radical reduction of downstream Omo and Kenya's Lake Turkana waters Presenting case studies of indigenous Dasanech and northernmost Turkana livelihood systems and Gibe III linked impacts on them the author predicts agropastoral and fishing economic collapse region wide hunger with exposure to disease epidemics irreversible natural resource destruction and cross border interethnic armed conflict spilling into South Sudan The book identifies fundamental failings of government and development bank impact assessments including their distortion or omission of mandated transboundary assessment cumulative effects of the Gibe III dam and its linked Ethiopia Kenya energy transmission highway project key

hydrologic and human ecological characteristics major earthquake threat in the dam region and widespread expropriation and political repression Violations of internationally recognized human rights especially by the Ethiopian government but also the Kenyan government are extensive and on the increase with collaboration by the development banks in breach of their own internal operational procedures A policy crossroads has now emerged The author presents the alternative to the present looming catastrophe consideration of development suspension in order to undertake genuinely independent transboundary assessment and a plan for continued development action within a human rights framework forging a sustainable future for the indigenous peoples now directly threatened and for their respective eastern Africa states Claudia Carr's book is a treasure of detailed information gathered over many years concerning river basin development of the Omo River in Ethiopia and its impact on the peoples of the lower Omo Basin and the Lake Turkana region in Kenya It contains numerous maps charts and photographs not previously available to the public The book is highly critical of the environmental and human rights implications of the Omo River hydropower projects on both the local ethnic communities in Ethiopia and on the downstream Turkana in Kenya David Shinn Former Ambassador to Ethiopia and to Burkina Faso Adjunct Professor of International Affairs The George Washington University Washington D C Annual List of Publications Great Britain.

After more than a decade of construction Ethiopia is filling the Grand Ethiopian Renaissance Dam GERD a controversial dam with the potential to transform the hydrology and politics of the Nile Basin The GERD is the culmination of a dam building boom carried out over three decades and a key pillar of the Ethiopian Peoples Revolutionary Democratic Front s EPRDF efforts to bring about an Ethiopian Renaissance Dams Power and the Politics of Ethiopia s Renaissance provides a detailed examination of the domestic and international political dynamics that shaped Ethiopia s dam building drawing on extensive primary research including more than a hundred interviews with politicians technocrats consultants and donors The authors reflect on the implications of Ethiopia s dam building for broader debates about the role of the state in late development the dynamics of twenty first century dam building and the political economy of renewable energy transitions A central argument of the book is that Ethiopia s dam building is symbolic of the successes and failures of the EPRDF s developmental state On the one hand this dams boom enhanced electricity generation capacity while constituting a key element of the state infrastructure investment that turned Ethiopia into one of the world s fastest growing economies In contrast a politically driven decision making process undermined electricity planning contributed to an unsustainable debt burden and ultimately failed to provide reliable electricity access to key users Following the EPRDF s collapse the subsequent Prosperity Party government has taken steps away from the state led development model of its predecessor while labouring towards the final completion of the GERD Oxford Studies in African Politics and International Relations is a series for scholars and students working on African politics and International Relations and related disciplines Volumes concentrate on contemporary developments in African political science political economy and International Relations such as electoral politics democratization decentralization gender and political representation the political impact of natural resources the dynamics and consequences of conflict comparative political thought and the nature of the continent s engagement with the East and West Comparative and mixed methods work is particularly encouraged Case studies are welcomed but should demonstrate the broader theoretical and empirical implications of the study and its wider relevance to contemporary debates The focus of the series is on sub Saharan Africa although proposals that explain how the region engages with North Africa and other parts of the world are of interest Series Editors Nic Cheeseman University of Birmingham Peace Medie University of Bristol and Ricardo Soares de Oliveira University of Oxford

The Politics of Development in Morocco Sylvia I. Bergh, 2017-01-30 Since the mid 1990s Morocco has sought to present itself as a model of genuine and gradual reform with decentralisation as a key tenet of this Here Sylvia Bergh investigates the dynamics of popular participation and local governance testing the extent to which the current structure builds local capacity or whether it is in fact a tool for soft state control She narrates the realities of local administration and civil society to shed critical light on questions of democratic transition in North Africa Her assessment of decentralisation and participatory development projects in rural Morocco and the legal and policy frameworks

in which they operate leads to the conclusion that they have generally not yet led to an expansion of a civil society able to build local capacity or enhance bottom up empowerment Grounded in an approach of the anthropology of policy this book makes an important contribution to literature on the democratisation development and governance in North Africa
