Cognitive Requirements for Information Operations Training (CRIOT) ,1999 The advent of battlefield digitization increases the work trainers for live force on force exercises must do to control exercises and provide feedback to units and it will pull trainers at platoon and company level out of the tactical information loop The goal of this study was to describe instrumentation capabilities with the potential for reducing workloads and pulling trainers back into the information loop for exercises at the Army s maneuver combat training centers CTCs and at home stations This study documents the experiences of approximately seventy of the National Training Center NTC observer controllers OCs and analysts that participated in the training of the Army s first digitized brigade during the Force XXI Army warfighting Experiment AWE To gain a better understanding of what is required to support digital training the study team reviewed emerging tactical doctrine from platoon through battalion task force level to develop a sample of potential digital training points and then designed displays that would help a trainer monitor unit performance with respect to these points The team then defined the capabilities a workstation would need to create these displays This report describes defends and illustrates twenty workstation capabilities that support exercise control and feedback for digitized units DTIC U.S. Army Desert Operations Handbook U.S. Department of the Army,2013-03-06 Imagine working all day in 100 degree plus temperatures under constant life threatening circumstances sometimes relying only on the negligible amount of hydration from a cactus you ve dug up This is the life of a U S Army soldier in places like Iraq Afghanistan and elsewhere which is why the U S Army Desert Operations Handbook is a vital reference for survival in one of the harshest environments in the world This official guide covers how to plan and conduct operations how the environment affects personnel and equipment and most importantly how to survive and receive supplies in the desert The obvious problems with extreme temperatures are water location and mobility However from handling and caring for firearms to operating and fueling a tank the entire game changes in the dry sandy desert conditions The skills in this guide are taken from lessons learned in real combat situations Success in desert operations requires the ability to adapt with constant terrain and temperature changes which are often drastic within the same twenty four hour period All the while the soldier must be able to move within a unit without being visible to unfriendly groups This combat tested manual is sure to arm anyone with the skills necessary to survive in the desert **Analysis of Emerging Digital and Back-up Training Requirements** Laura A. Requirements Laura A. Ford,Roy C. Campbell,Robert Cobb,1998 Digitization is the future of the Army However along with
 digitization come training and personnel implications This report discusses training issues associated with digitization
 specifically those that address a need to train and maintain backup along with digital skills Backup skills are the individual
 and collective skills required when digital systems are degraded or unavailable The study focused on the digital M1A2
 Abrams Main Battle training program as an exemplar Lessons learned about digital and backup training requirements should
 be applied in the M2A3 training program The study investigated issues that are applicable to a wide range of digital
 applications and training conditions The study examined individual and collective tasks that support tank operations and
 found both digital and backup tasks to be poorly defined particularly in collective performance A method for analysis is
 described and analytic results reported The study also outlines the current state of training armor and infantry soldiers and
 the impact that increased digitization may have on training pipelines The study employed a series of expert groups to define
 issues and formulate recommendations These groups included users developers researchers and trainers with a wide
 spectrum of experience and viewpoints Expert group results are reported and include 15 primary issues and accompanying
 recommendations **Literaturblatt für germanische und romanische Philologie** Otto Behagel,Fritz Neumann,Karl
