

8. UNDERGROUND

8.1 PREFACE

This lesson will cover the procedures required for underground studies. Two things to keep in mind; first, use Fluor standards as a guide, and second, the guidelines mentioned in this lesson may be different than jobs you may have worked on in the past. Some clients have their own engineering standards.

8.1.1 Lesson Objectives

Lessons provide self-directed piping layout training to designers who have basic piping design skills. Training material can be applied to manual or electronic applications. Lesson objectives are:

- To know the types of underground systems.
- To know how to make underground studies avoiding major mistakes and costly changes.
- To familiarize you with Fluor standards. (Fluor standards are a guide. The standards used on your contract may differ.)

8.1.2 Lesson Study Plan

Take the time to familiarize yourself with the lesson sections. The following information will be required to support your self-study:

- Your copy of the Reference Data Book (R.D.B.)
- Fluor Technical Practices. The following Technical Practices support this lesson:

000.210.1150
000.210.1160
000.210.1200
000.210.1210
000.210.1211
