We have just one more phylum to cover in Ecdysozoa, but it's a big one. In fact, it's the biggest of all the animal phyla, both in terms of species diversity and biomass. What do spiders and lobsters have in common? It may surprise you to learn that these two animals actually fall into the same phylum. Hank continues our exploration of animal phyla with the more complexly organized annelida and Dan Babbitt, manager of the Smithsonian's Insect Zoo, shows why the name of the zoo is a little imprecise. The Insect Zoo is home to a vast collection of insects, and it's really without question, the single most successful
