differentiate between incremental & residual cash flows. At the start of every year, for the last two decades, I have invited people to partake in the classes that I teach at the Stern School of Finance. I define myself as a teacher, not a professor, an academic or a researcher, and there is nothing else that I would rather do. In this session, we started by reviewing the pitfalls of regression betas. They are backward-looking, noisy and subject to game theory. In today's class, we closed the book on pricing by looking at how to find the right peer group for your company and how to control for it. I teach in the spring of each year, and ahead of my Spring 2024 classes (two sections of valuation for the MBAs and one for the PhDs). In this session, I look at interest rates and why they vary across time, starting with fundamentals (inflation and real growth) and ending with the term structure. During this class, we started by continuing to examine how to deconstruct multiples to determine what drives each multiple, using the following:
