Conventional Choices? Ian Stewart, David Stewart, 2011-11-01 Selecting a leader is a momentous and defining choice for a political party Leaders symbolize their party and are a primary factor in election outcomes While much is known about the selection of national party leaders less is known about the provincial selection process particularly in the Maritimes Breaking new ground Conventional Choices examines twenty five different leadership elections in three maritime provinces The analysis draws on an extraordinarily rich data set spanning thirty two years to explore the backgrounds attitudes and motivations of those who select party leaders It is an impressive study that offers fresh insights into leadership selection and Maritime party politics **Subject Catalog** Library of Congress, 1980-10 **Public Goods, Public Enterprise, Public Choice** Lionel Orchard, Hugh Stretton, 2016-07-27 A brilliant critical and fresh look at the public choice school of thought

Paul Streeten This book challenges theories of public goods public enterprise and public choice on three fronts Government action reflects wider interests and commitments than just the material self interest assumed as primary by the three theories Government contributes to the productivity and quality of the modern mixed economy in ways not captured by theories stressing the inherent superiority of private markets Lastly old and new ideas within established traditions of political thought justify government action beyond the libertarian argument for limited government *Traffic Systems Reviews and Abstracts* United States. Federal Highway Administration, 1967 Ranked Choice Voting James W. Endersby, Michael J. Towle, 2025-02-26 Ranked choice voting RCV is an electoral and political reform sweeping across North America already adopted in a variety of places including New York City the state of Maine and cities and towns in Minnesota California and Utah In localities using RCV voters don't cast just a single vote for one candidate but rank candidates according to preference first choice second choice third and so forth To be elected a candidate must win a majority not a plurality of votes Though touted by proponents as way to enhance voter satisfaction with elections promote trust in government and increase voter turnout the implementation of RCV is not without its challenges In Ranked Choice Voting James W Endersby and Michael J Towle provide a comprehensive and balanced analysis of RCV systems drawing from examples across the United States to evaluate how they function Using a wealth of data from observed elections outcomes to election theory from political history to interviews with advocates and election administrators the authors detail the history strengths and weaknesses of RCV and preferential voting more generally Broad ranging even handed and evidence based this authoritative overview of an increasingly popular format for democratic elections in the US will appeal to anyone interested in electoral reform and American democracy more generally **Glorious Daze** Jim Chalmers, 2013-07-01 Why does Australia a nation with one of the world's best economies have such a dim view of its own performance Why does it see itself as worse off than some of the basket case economies of southern Europe How did a country that was smart enough to avoid recession and mass

unemployment despite a global meltdown get so down on itself In *Glory Daze* Jim Chalmers argues that the combination of hyper partisanship and self serving incentives in politics have resulted in a deficit of national self esteem This insider account provides a unique perspective on national identity Chalmers concludes that unless a stop is put to the poisonous politics of recent years Australia runs the risk of squandering existing national advantages and compromising our ability to tackle the challenges of the future
