The New York Times I always expect the best from George R R Martin and he always delivers Robert Jordan *An Informal History of the Hugos* Jo Walton, 2018-08-07 Engaged passionate and consistently entertaining *An Informal History of the Hugos* is a book about the renowned science fiction award for the many who enjoyed Jo Walton's previous collection of writing from Tor.com the Locus Award winning *What Makes This Book So Great* The Hugo Awards named after pioneer science fiction publisher Hugo Gernsback and voted on by members of the World Science Fiction Society have been presented since 1953 They are widely considered the most prestigious awards in science fiction Between 2010 and 2013 Jo Walton wrote a series of posts for Tor.com surveying the Hugo finalists and winners from the award's inception up to the year 2000 Her contention was that each year's full set of finalists generally tells a meaningful story about the state of science fiction at that time Walton's cheerfully opinionated and vastly well informed posts provoked valuable conversation among the field's historians Now these posts lightly revised have been gathered into this book along with a small selection of the comments posted by SF luminaries such as Rich Horton Gardner Dozois and David G Hartwell A remarkable guided tour through the field a kind of nonfiction companion to *Among Others* It's very good It's great New York Times bestselling author Cory Doctorow Boing Boing on *What Makes This Book So Great* **The Inter-Galactic Playground** Farah Mendlesohn, 2009-07-15 Science fiction is often considered the genre of ideas and imagination which would seem to make it ideal for juveniles and young adults however the ideas are often dispensed by adults This book considers the development of science fiction for children and teens between 1950 and 2010 exploring why it differs from science fiction aimed at adults In a broader sense this critical examination of 400 texts sheds light on changing attitudes toward children and teenagers toward science education and toward the authors' expectations and sociological views of their audience *Astrofuturism* De Witt Douglas Kilgore, 2010-08-03 *Astrofuturism* *Science Race and Visions of Utopia in Space* is the first full scale analysis of an aesthetic scientific and political movement that sought the amelioration of racial difference and social antagonisms through the conquest of space Drawing on the popular science writing and science fiction of an eclectic group of scientists engineers and popular writers De Witt Douglas Kilgore investigates how the American tradition of technological utopianism responded to the political upheavals of the twentieth century Founded in the imperial politics and utopian schemes of the nineteenth

century astrofuturism envisions outer space as an endless frontier that offers solutions to the economic and political problems that dominate the modern world. Its advocates use the conventions of technological and scientific conquest to consolidate or challenge the racial and gender hierarchies codified in narratives of exploration. Because the icon of space carries both the imperatives of an imperial past and the democratic hopes of its erstwhile subjects, its study exposes the ideals and contradictions endemic to American culture. Kilgore argues that in the decades following the Second World War the subject of race became the most potent signifier of political crisis for the predominantly white and male ranks of astrofuturism. In response to criticism inspired by the civil rights movement and the new left, astrofuturists imagined space frontiers that could extend the reach of the human species and heal its historical wounds. Their work both replicated dominant social presuppositions and supplied the resources necessary for the critical utopian projects that emerged from the antiracist, socialist, and feminist movements of the twentieth century. This survey of diverse bodies of literature conveys the dramatic and creative syntheses that astrofuturism envisions between people and machines, social imperatives and political hope, physical knowledge and technological power. Bringing American studies, utopian literature, popular conceptions of race and gender, and the cultural study of science and technology into dialogue, *Astrofuturism* will provide scholars of American culture, fans of science fiction, and readers of science writing with fresh perspectives on both canonical and cutting-edge astrofuturist visions.

Economic Science Fictions William Davies, 2018-05-04. An innovative new anthology exploring how science fiction can motivate new approaches to economics. From the libertarian economics of Ayn Rand to Aldous Huxley's consumerist dystopias, economics and science fiction have often orbited each other. In *Economic Science Fictions*, editor William Davies has deliberately merged the two worlds, asking how we might harness the power of the utopian imagination to revitalize economic thinking. Rooted in the sense that our current economic reality is no longer credible or viable, this collection treats our economy as a series of fictions and science fiction as a means of anticipating different economic futures. It asks how science fiction can motivate new approaches to economics and provides surprising new syntheses merging social science with fiction, design with politics, scholarship with experimental forms. With an opening chapter from Ha Joon Chang as well as theory, short stories, and reflections on design, this book from Goldsmiths Press challenges and changes the notion that economics and science fiction are worlds apart. The result is a wealth of fresh and unusual perspectives for anyone who believes the economy is too important to be left solely to economists. Contributors: AUDINT, Khairani Barokka, Carina Brand, Ha Joon Chang, Miriam Cherry, William Davies, Mark Fisher, Dan Gavshon, Brady and James Pockson, Owen Hatherley, Laura Horn, Tim Jackson, Mark Johnson, Bastien Kerspern, Nora O'Murch, Tobias Revell, et al., Judy Thorne, Sherryl Vint, Joseph Walton, Brian Willems.

Science Fiction Magazine Story Index, 1926-1995 Terry A. Murray, 1999. Since the appearance of the first science fiction magazine in 1926, thousands of short stories have been published in periodicals devoted to the genre. These stories cover a wide range of subjects, from spacecraft to the human condition, and feature little-known authors as well as

masters like Ellison and Asimov In the past finding which issue of what magazine ran a certain story was nearly impossible This much needed reference tool provides valuable assistance in the daunting task of locating short stories published in science fiction magazines providing exhaustive indexes to magazines authors and titles allowing a variety of options for research on 34 000 stories appearing in nearly 5 000 issues of 133 genre magazines Stories from all major American publications as well as from several minor periodicals are indexed Also included is an appendix of the best known and most prolific contributors giving the titles of all their stories in this work necessary because the huge author index does not show titles A guide to how to use this book clarifies its features for the researcher
