City At The End Of Time Greg Bear:

City at the End of Time Greg Bear, 2008-08-05 Multiple Hugo and Nebula award winning author Greg Bear is one of science fiction's most accomplished writers. Bold scientific speculation, riveting plots, and a fierce humanism reflected in characters who dare to dream of better worlds distinguish his work. Now Bear has written a mind-bendingly epic novel that may well be his masterpiece. Do you dream of a city at the end of time? In a time like the present in a world that may or may not be our own, three young people, Ginny Jack and Daniel, dream of a doomed decadent city of the distant future, the Kalpa. Ginny's and Jack's dreams overtake them without warning, leaving their bodies behind while carrying their consciousnesses forward into the minds of two inhabitants of the Kalpa: a would-be warrior, Jebrassy, and an inquisitive explorer, Tiadba, who have been genetically retro-engineered to possess qualities of ancient humanity. As for Daniel, he dreams of an empty darkness, all that his future holds. But more than dreams link Ginny, Jack, and Daniel. They are fate shifters, born with the ability to skip like stones across the surface of the fifth dimension, inhabiting alternate versions of themselves. And each guards an object whose origin and purpose are unknown: gnarled, stony artifacts called sum runners that persist unchanged through all versions of time. Hunted by others with similar powers who seek the sum runners on behalf of a terrifying goddess-like entity known as the Chalk Princess, Ginny, Jack, and Daniel are drawn despite themselves into an all-but-hopeless mission to rescue the future and complete the greatest achievement in human history.

In a time like the present on a world that may or may not be our own, three young people, Ginny, Jack, and Daniel, dream of a fabulous decadent city in the distant future, the Kalpa. The dreams of Ginny and Jack overtake them without warning, leaving their bodies behind while carrying their consciousnesses forward into the minds of two inhabitants of the Kalpa: a would-be warrior, Jebrassy, and an inquisitive explorer, Tiadba, who have been genetically retro-engineered to possess qualities of ancient humanity. In turn, the dreams of Tiadba and Jebrassy carry them back into the minds of Jack and Ginny. As for Daniel, he dreams of an empty darkness, all his future holds. But more than dreams link Ginny, Jack, and Daniel. They are fate shifters, born with the ability to skip like stones across the surface of the fifth dimension, inhabiting alternate versions of themselves. And they are each guardians of an object whose origins and purpose are unknown: a gnarled, stony artifact called a sum runner that persists unchanged through all versions of time. They can save the future, but they are being hunted down.

Time Travel David Wittenberg, 2016-01-01 This stimulating contribution to literary theory reveals the deeply philosophical concerns and developments behind popular time travel sci-fi. London Review of Books. In Time Travel, literary theorist David Wittenberg argues that time travel fiction is not mere escapism but a narrative laboratory where theoretical questions about storytelling and, by extension, about the philosophy of temporality, history, and subjectivity are presented in story form. Drawing on physics, philosophy, narrative theory, psychoanalysis, and film theory, Wittenberg links innovations in time travel fiction to specific shifts in the popularization of science from nineteenth-century evolutionary

biology to twentieth century quantum physics and more recent multiverse cosmologies Wittenberg shows how popular awareness of new science led to surprising innovations in the literary time machine which evolved from a vehicle used for sociopolitical commentary into a psychological device capable of exploring the temporal structure and significance of subjects viewpoints and historical events Time Travel draws on classic works of science fiction by H G Wells Edward Bellamy Robert Heinlein Samuel Delany and Harlan Ellison television shows such as The Twilight Zone and Star Trek and other popular entertainments These are read alongside theoretical work ranging from Einstein Schrödinger Stephen Hawking to Gerard Genette David Lewis and Gilles Deleuze Wittenberg argues that even the most mainstream audiences of popular time travel fiction and cinema are vigorously engaged with many of the same questions about temporality identity and history that concern literary theorists media and film scholars and philosophers
