Optimizing Play Christopher A. Paul, 2024-05-14 An unexpected take on how games work what the stakes are for them and how game designers can avoid the traps of optimization The process of optimization in games seems like a good thing who wouldn't want to find the most efficient way to play and win As Christopher Paul argues in *Optimizing Play* however optimization can sometimes risk a tragedy of the commons where actions that are good for individuals jeopardize the overall state of the game for everyone else As he explains players inadvertently limit play as they theorycraft seeking optimal choices The process of developing a meta or the most effective tactic available structures decision making causing play to stagnate A stale meta then creates a perception that a game is solved and may lead players to turn away from the game Drawing on insights from game studies rhetoric the history of science ecology and game theory literature Paul explores the problem of optimization in a range of video games including Overwatch FIFA EA Sports FC NBA 2K Clash Royale World of Warcraft and League of Legends He also pulls extensively from data analytics in sports where the problem has progressed further and is even more intractable than it is in video games given the money sports teams invest to find an edge Finally Paul offers concrete and specific suggestions for how games can be developed to avoid the trap set by optimization run amok

The Toxic Meritocracy of Video Games Christopher A. Paul, 2018-02-20 An avid gamer and sharp media critic explains meritocracy's negative contribution to video game culture and what can be done about it Video games have brought entertainment education and innovation to millions but gaming also has its dark sides From the deep bred misogyny epitomized by GamerGate to the endemic malice of abusive player communities gamer culture has had serious real world repercussions ranging from death threats to sexist industry practices and racist condemnations In *The Toxic Meritocracy of Video Games* new media critic and longtime gamer Christopher A Paul explains how video games focus on meritocracy empowers this negative culture Paul first shows why meritocracy is integral to video game design narratives and values Games typically valorize skill and technique and common video game practices

such as leveling build meritocratic thinking into the most basic premises Video games are often assumed to have an even playing field but they facilitate skill transfer from game to game allowing certain players a built in advantage The Toxic Meritocracy of Video Games identifies deep seated challenges in the culture of video games but all is not lost As Paul argues similarly meritocratic institutions like professional sports and higher education have found powerful remedies to alleviate their own toxic cultures including active recruiting and strategies that promote values such as contingency luck and serendipity These can be brought to the gamer universe Paul contends ultimately fostering a more diverse accepting and self reflective culture that is not only good for gamers but good for video games as well
