

2. House Preparation - Pre-Placement

2.1 Stocking Density

Correct stocking density is essential to the success of a broiler production system by ensuring adequate room for optimal performance. In addition to the performance and profit considerations, correct stocking density also has important welfare implications. To accurately assess stocking density, factors such as climate, housing types, ventilation systems, processing weight and welfare regulations must be taken into account. Incorrect stocking density can lead to leg problems, scratching, bruising and mortality. Furthermore, litter integrity will be compromised.

Thinning a portion of the flock is one approach to maintaining optimum bird density. In some countries, a higher number of birds are placed in a house and reared to two different weight targets. At the lower weight target, 20-50% of the birds are removed to satisfy sales in this market segment. The remaining birds then have more space and are reared to a heavier weight.

Many different stocking densities are employed around the world. In warmer climates a stocking density of 30 kg/m² is closer to ideal. General recommendations are:

House Type	Ventilation Type	Equipment	MAXIMUM Stocking Density
Open Sided	Natural	Stir Fans	30 kg/m ² (6.2 lb/ft ²)
Open Sided	Positive Pressure	Side wall fans @ 60°	35 kg/m ² (7.2 lb/ft ²)
Solid Wall	Cross Ventilation	European Set-up	35 - 42 kg/m ² (7.2 - 8.6 lb/ft ²)
Solid Wall	Tunnel Ventilation	Foggers	39 kg/m ² (8.0 lb/ft ²)
Solid Wall	Tunnel Ventilation	Evaporative Cooling	42 kg/m ² (8.6 lb/ft ²)

Tropical Broiler Chicken Management Guide Hauhouot Diambra-Odi, 2013-09-16 *Tropical Broiler Chicken Management Guide* is about the basics for raising chicken for meat Housing and feeding is adapted to the tropics where environmental temperature and humidity present a challenge for the poultry grower **Sustainable broiler production in North**

Macedonia - A value chain guide to best practice Food and Agriculture Organization of the United Nations, 2019-12-18 The Sustainable Broiler Production in North Macedonia A Value Chain Guide to Best Practice is to enhance the development of a sustainable broiler meat industry in North Macedonia so as to deliver a high quality product that can compete directly with the current high volume of imported product This Guide is a tool that supports the FAO mission to advance track record of efficiency gains and better environmental stewardship Broiler growers integrators processors suppliers food service companies retailers and outside stakeholders realise the importance of working together to collaborate on the shared goals of implementing best practices tracking progress and continuing to drive continuous improvement through the creation of the Guide including the best management practices as outlined in this document The Guide is a tool to support and communicate continuous improvement in sustainability through leadership innovation multi stakeholder engagement and collaboration It successfully aggregates a list of best management practices that could be utilised on farms hatcheries and processing operations both today and into the future It also incorporates the important function of maintaining the highest achievable standards for welfare and food safety The Guide has been developed by FAO and the Faculty of Agricultural Sciences and Food of the Republic of North Macedonia It is expected that this publication will serve as a practical guide providing valuable information to both experienced and novice poultry producers alike as well as for students researchers

Commercial Chicken Meat and Egg Production Donald D. Bell, William D. Weaver, 2012-12-06 *Commercial Chicken Meat and Egg Production* is the 5th edition of a highly successful book first authored by Dr Mack O North in 1972 updated in 1978 and 1984 The 4th edition was co authored with Donald D Bell in 1990 The book has achieved international success as a reference for students and commercial poultry and egg producers in every major poultry producing country in the world The 5th edition is essential reading for students preparing to enter the poultry industry for owners and managers of existing poultry companies and for scientists who need a major source of scientifically based material on poultry management In earlier editions the authors emphasized the chicken and its management The 5th edition with the emphasis shifted to the commercial business of managing poultry contains over 75% new material The contributions of 14 new authors make this new edition the most comprehensive such book available Since extensive references are made to the international aspects of poultry management all data are presented in both the Imperial and Metric form Over 300 tables and 250 photos and figures support 62 chapters of text New areas include processing of poultry and eggs with thorough discussions of food safety and further processing The business of maintaining poultry is discussed in chapters on economics model production firms the use

of computers and record keeping Updated topics include breeders and hatchery operations broiler and layer flock management replacement programs and management of replacements nutrition and flock health New chapters address flock behavior ventilation waste management egg quality and egg breakage Other new features include a list of more than 400 references and a Master List of the tables figures manufacturers of equipment and supplies research institutions books and periodicals breeders and trade associations Commercial growers will find the tables of data of particular interest scientists will be able to utilize the extensive references and to relate their areas of interest to the commercial industry s applications and students will find that the division of the book into 11 distinct sections with multiple chapters in each will make the text especially useful **Achieving sustainable production of poultry meat Volume 1** Prof. Steven C. Ricke,2016-12-31

Reviews latest research on zoonoses affecting poultry meat such as Salmonella and Campylobacter as well as methods for their control on the poultry farm and in the slaughterhouse Summarises advances in understanding and optimising poultry quality traits such as flavour colour tenderness shelf life and nutritional quality Discusses developments in measuring and reducing the environmental impact of poultry production Achieving sustainable production of poultry meat Volume 1 Steven C. Ricke,2017-01-01 To meet growing demand the FAO has estimated that world poultry production needs to grow by 2.3% per year to 2030 Much of the increase in output already achieved has been as a result of improvements in commercial breeds combined with rearing in more intensive production systems However more intensive systems and complex supply chains have increased the risk of rapid transmission of animal diseases and zoonoses Consumer expectations of sensory and nutritional quality have never been higher At the same time consumers are more concerned about the environmental impact of poultry production as well as animal welfare Drawing on an international range of expertise this book reviews research on safety quality and sustainability issues in poultry production Part 1 discusses risks from pathogens detection and safety management on farms and in slaughterhouse operations Part 2 looks at ways of enhancing the flavour colour texture and nutritional quality of poultry meat Finally the book reviews the environmental impact of poultry production **Achieving sustainable production of poultry meat Volume 1** Safety quality and sustainability will be a standard reference for poultry and food scientists in universities government and other research centres and companies involved in poultry production It is accompanied by two further volumes which review poultry breeding nutrition health and welfare *Kanatlı Hayvan Yetiştirme* Sezen ÖZKAN,Servet YALÇIN,2025-03-24

The effect of muscle pathogenesis on avian physiology, animal welfare, and quality of muscle as a food Wei Guo,Sandra G. Velleman,Gale M. Strasburg,2025-05-15 Over the past several decades the poultry industry has achieved huge improvements in global poultry production including with increased growth performance improved body composition higher market weight increased feed efficiency reduced production costs and increased profitability for growers These gains have resulted from a combination of intensive genetic selection tailored nutritional approaches and novel poultry management strategies However these improvements in broiler

chicken and turkey production have also come with costs. These costs include increased susceptibility to environmental stress, increased mortality in commercial poultry flocks and muscle pathogenesis ultimately leading to deleterious effects on meat quality traits affecting appearance, texture and protein functionality. For example, a subset of fast growing domestic turkeys develops spontaneous cardiomyopathy or round heart disease that leads to a mortality rate up to 15% at 2 to 4 weeks of age. Even turkeys that survive the critical first two weeks after hatch already have damaged hearts at a prevalence of 80% to 90% which may lead to growth retardation during the grow out phase. This syndrome can also occur in broiler chickens which causes major economic losses and limits the maximum profitability in the poultry industry world wide. Another example is wooden breast, an abnormal muscle condition resulting in a hardening of the breast muscle affecting meat texture. Other examples include green muscle disease also known as deep pectoral muscle myopathy, spaghetti meat and white striping. All of these pathologies include the development of myopathic changes subsequently affecting meat quality leading to consumer complaints and economic losses by the processing industry. There is a paucity of information on the etiologies of broiler and turkey muscle pathogenesis and their consequent effects on muscle physiology. This Research Topic will highlight the mechanisms of skeletal and cardiac muscle pathogenesis in poultry that are responsible for premature bird mortality and altered quality of muscle as a food. This research topic will cover the recent findings in the area of myopathies in poultry. Original Research and Review papers among other article types are welcome to be submitted to this collection.

Wheat and Rice in Disease Prevention and Health Ronald Ross Watson, Victor R Preedy, Sherma Zibadi, 2014-01-22. Wheat and Rice in Disease Prevention and Health reviews the wide range of studies focusing on the health benefits and disease prevention associated with the consumption of wheat and rice, the two most widely consumed whole grains. This book provides researchers, clinicians and students with a comprehensive, definitive and up to date compendium on the diverse basic and translational aspects of whole grain consumption and its protective effects across human health and disease. It serves as both a resource for current researchers as well as a guide to assist those in related disciplines to enter the realm of whole grain and nutrition research. Overall studies have shown that a decrease in the amount of whole grains in the modern diet is related to a corresponding increase in health problems that are attributed to this all too common dietary imbalance. The resulting health issues associated with an over processed diet which provides inadequate levels of nutrients from whole grains may include obesity, diabetes, high blood lipids, chronic inflammatory states and an excess of oxidative stress. Strength and endurance may also suffer as a result of these nutrient deficiencies followed by declines in energy and immunity. Saves researchers and clinicians time in quickly accessing the latest details on a broad range of nutritional and epidemiological issues. Provides a common language for nutritionists, nutrition researchers, epidemiologists and dietitians to discuss how the action of wheat and rice protect against disease and modify human health. Preclinical, clinical and population studies help nutritionists, dietitians and clinicians map out key areas for research and further clinical recommendations.

Breeding dan Penetasan Unggas Dyah Lestari Yulianti, Heni Setyo Prayogi, Adelina Ari Hamiyanti, Eka Nurwahyuni, Faizal Andri, Filoza Marwi, 2023-12-31 Buku Ajar Manajemen Breeding dan Penetasan Unggas adalah referensi bagi mahasiswa yang memprogram mata kuliah Manajemen Breeding dan Penetasan Unggas. Mata kuliah tersebut menyusun struktur Kurikulum Program Studi Peternakan Fakultas Peternakan Universitas Brawijaya 2020. Buku Ajar Manajemen Breeding dan Penetasan Unggas terbagi menjadi dua bagian. Bagian pertama mengulas tentang Manajemen Breeding dan bagian kedua mengulas tentang Manajemen Penetasan. Komoditas ternak difokuskan pada manajemen breeding farm dan penetasan ayam ras. Peternakan unggas dikembangkan oleh masyarakat dengan berbagai tujuan. Breeding farm unggas bertujuan untuk mengembangbiakkan unggas agar populasi cukup untuk memenuhi kebutuhan protein hewani masyarakat. Bagian satu pada buku ini dengan rinci memberikan penjelasan tentang manajemen breeding yang meliputi bibit, manajemen perkandangan, manajemen pakan, manajemen pemeliharaan, manajemen pencegahan penyakit, serta monitoring dan evaluasi. Bagian kedua buku ini memberikan penjelasan tentang manajemen penetasan yang menguraikan tentang biosecurity, manajemen telur, tetas, operasional mesin tetas, manajemen penetasan, monitoring dan evaluasi penetasan.

Improving poultry meat quality Prof. Massimiliano Petracci, Dr. Mario Estévez, 2022-12-06 Considers the impact of dietary background and availability of key nutrients and micronutrients on poultry meat quality. Reviews the key quality defects associated with poultry muscle development including dorsal cranial myopathy, DCM, pale soft exudative PSE and intramuscular connective tissue (ICMT). Provides a detailed assessment of the individual quality traits. Consumer expectations are driven by colour, texture and flavour.

Poultry Science Colin G. Scanes, Karen D. Christensen, 2019-11-06 Poultry production continues to make tremendous advances. This thoroughly revised fifth edition of Scanes' seminal comprehensive text presents students and professionals alike with valuable research-based material relevant to all stages of a poultry career. Areas covered include global and commercial poultry production, poultry business organization and production of meat chickens, broilers, turkeys, eggs, ducks, geese, game birds and other poultry. Other chapters cover the fundamental science behind production: poultry biology, genetics, behavior, diseases, health, housing, ventilation and processing. New or greatly expanded sections cover biosecurity, poultry stress, welfare, feed additives, food safety, incubation, controlling pests, poultry waste and environmental issues, brooding and organic free range and niche poultry production. Points for Discussion and Deeper Dive sections highlight key examples and provide further context and empirical data for critical areas in poultry production, giving students a first-hand look at issues in both small and large operations. The book concludes with an in-depth, invaluable chapter on applying for internships and positions for the start of a successful career.

Antimicrobial Resistance in Bacteria from Livestock and Companion Animals Stefan Schwarz, Lina Maria Cavaco, Jianzhong Shen, 2020-07-02 The global spread of antimicrobial-resistant pathogenic bacteria is a continuing challenge to the health care

of humans and domesticated animals With no new agents on the horizon it is imperative to use antimicrobial agents wisely to preserve their future efficacy Led by Editors Stefan Schwarz Lina Maria Cavaco and Jianzhong Shen with Frank M ller Aarestrup an international team of experts in antimicrobial resistance of livestock and companion animals has created this valuable reference for veterinary students and practitioners as well as researchers and decision makers interested in understanding and preventing antimicrobial resistance *Advances in poultry nutrition* Professor Todd J.

Applegate,2024-09-10 Reviews the development of novel feed sources as feed for poultry focussing on the use of essential oils macroalgae microalgae and corn fermented protein Addresses the recent advances in understanding the role of individual nutrients and additives in poultry nutrition Considers the range of methods and techniques implementable to maintain the safety of poultry feed and prevent mycotoxin contamination *Avian Senses, Immunology, and Welfare* Rami A.

Dalloul,Ryan Arsenault,Nico Nazar,Maria Emilia Fernandez,Eugeni Roura,Eve Schneider,Shahram Niknafs,2024-12-31 Understanding the complex interactions between avian physiology senses and immune responses is crucial for ensuring the welfare and adaptive success of bird species in various environments Avian physiology is intimately linked to their welfare influencing how birds cope with environmental stressors through a range of physiological pathways Their sensory perceptions play a pivotal role in navigating and adapting to diverse habitats from urban landscapes to wild ecosystems Additionally avian immunology provides insights into how birds respond to diseases and stressors which is vital for improving health outcomes particularly in the context of rising global demands for poultry products **Perspectives in Avian**

Skeletal Systems and Skeletal Abnormalities Chongxiao (Sean) Chen,Anthony Pokoo-Aikins,Prafulla Regmi,Shu-cheng Huang,Mujeeb Ur Rehman,2023-10-16 The avian skeletal system is drawing increasing attention from researchers because it serves as a unique research model to study bone metabolism and pathologies as well as the importance of bone health and its relationship with animal productivity and welfare The avian skeleton is a delicate system providing structural support to the bird and minerals for eggshell formation meanwhile functioning as an immune organ There is a lack of complete understanding of the physiological difference between mammalian and avian bones the impact of genetic improvements the interaction between immunity and bone health the avian bone 3D structural development and turnover the biological function of avian bone and its relationship with animal well being Additionally skeletal abnormalities can have a serious effect on poultry farming whereby conditions such as osteomyelitis rickets and chondrodystrophy among others can cause changes in gait patterns reduced walking ability and other pathophysiologicals with subsequent detrimental effects on feed conversion and growth as well as economic losses **Avian incubation conditions: Role in embryo development,**

Nollet,2023-08-28 Continued genetic development of pigs and poultry has been the foundation of profitable production within

a competitive market However the challenges of these production increases have undoubtedly taken their toll on reproductive function in all breeding livestock with the incidence of infertility increasing at an alarming rate For example it has recently been estimated that over 40% of sows are culled due to fertility problems compared to just 12% with feet and leg issues This edited collection of papers is taken from a series of seminars devoted to bringing together some of the world's leading authorities in the field of pig and poultry reproduction The fundamental aim being to re-examine the current trends in productivity in the pig and poultry industries and to identify nutritional means to improve fertility It considers the effects of essential nutrients in optimising productivity and discusses innovative applications of nutrition that will help to enhance fertility The success of such innovations within entrepreneurial integrated systems is also covered together with the importance of producing a quality chick and piglet at birth hatching Finally the role of management and the need for least cost production is discussed Nutritional Approaches to Arresting the decline in Fertility of Pigs and Poultry is aimed at nutritionists and animal producers as well as students and researchers studying animal and applied biological sciences

Alternative Systems for Poultry Victoria Sandilands, Paul M. Hocking, 2012-01-01 Recent interest in how poultry are housed and managed in order to ensure profitability sustainability and good levels of animal welfare are challenging issues that commercial poultry keepers face particularly where legislation is bringing about legal requirements for housing This book compares and contrasts alternative housing with conventional and traditional systems for commercial poultry laying hens meat chickens turkeys waterfowl and gamebirds with regards to welfare disease health nutrition sustainability and genotype environment interaction It is suitable for researchers and students in poultry science
