guaranteed minimum income has been central to British social policy debates for more than a century Since the First World
War a variety of market economists radical activists and social reformers have emphasized the possibility of tackling poverty
through direct cash transfers between the state and its citizens As manufacturing employment has declined and wage
inequality has grown since the 1970s cash benefits and tax credits have become an important source of income for millions of
working age households including many low paid workers with children The nature and purpose of these transfer payments
however remain highly contested Conservative and New Labour governments have used in work benefits and conditionality
requirements to activate the unemployed and reinforce the incentives to take low paid work an approach which has reached
its apogee in Universal Credit By contrast a growing number of campaigners have argued that the challenge of providing
economic security in an age of automation would be better met by paying a Universal Basic Income to all citizens Transfer
State provides the first detailed history of guaranteed income proposals in modern Britain which brings together intellectual
history and archival research to show how the pursuit of an integrated tax and benefit system has shaped UK public policy
since 1918 The result is a major new analysis of the role of cash transfers in the British welfare state which sets Universal
Credit in a historical perspective and examines the cultural and political barriers to a Universal Basic Income *The British
