Wer Freud Ideen gab Thomas Barth, 2013 Sigmund Freud Wer beeinflusste ihn? Wie entwickelte er seine Ideen? Ausgehend von Freuds Schriften werden diese Fragen auf mögliche Einflüsse von Personen die zu seiner Zeit oder davor gelebt hatten systematisch untersucht. Dabei zeigt sich dass Antworten oft komplexer ausfallen können als dies auf den ersten Blick den Anschein haben mag. Da ideengeschichtliche Fragestellungen dieser Art oft mit Unschärfen der Bestimmbarkeit verbunden sind. Insgesamt 16 verschiedene Arten von Unschärfen werden hier methodisch erfasst und in den Forschungsprozess integriert. Einen weiteren inhaltlichen Schwerpunkt bildet die Erforschung von Einflüssen entwicklungsgeschichtlicher Ideen u.a. von Lamarck Goethe Darwin und Haeckel auf Freuds Theoriebildung. Das hierfür verwendete Untersuchungsmaterial umfasst 160 Textbeispiele aus 70 Originalwerken und Briefen. Thomas Barth geb. 1965 promovierte an der Sigmund Freud Privatuniversität Wien im Fach Psychotherapiewissenschaft und arbeitet als Psychoanalytiker in freier Praxis.

Complex Knowledge for Innovation in Economic and Social Development Rafael M. Gutierrez, 2024-10-31 The solution to the significant modern problems that impede the development of human society demands a cultural evolution based on knowledge All the necessary disciplinary tools already exist it is only essential to organize them into a coherent interdisciplinary complexity encompassing natural social and human sciences However ignorance in its most modern forms conveniently disperses the diversity of disciplinary knowledge transforming complementary differences into conflicts the potential of diversity into the injustice of prejudice and the power of complexity into the realm of complication Human beings have the capacity to imagine and innovate their own future to solve and dissolve with enlightenment the problems they have created in their ignorance to liberate themselves and take responsibility to develop values and to create a coherent and objective vision of the world They can imagine and build a synergy of personal and social futures developing both in a sustainable way Modern interdisciplinary knowledge clearly shows that the future of humanity can be bright if it manages to consistently integrate natural social and human knowledge overcoming the power of modern forms of ignorance that separate them and create artificial conflicts
